yeah, he's calling you by the way.

I don't think its obvious to you yet, so I'll make it plain and simple: your attempts to harass will only cause me to dig in deeper (and this you don't want, because I might actually find something on you that can be really damaging). The best advice is for you to leave it alone. don't pursue it any further. you have lost the war (and are too stupid to realize it).

lastly, you are being dropped into the ignore filters, so unless someone else quotes you (or you change screen names AGAIN), you will not hear from me. Any further attempts on your part will be dealt with appropriately.

I thought we were fighting the breaking of rules on the citizen's radio service. High power, etc.

I don't think bringing people's family into an argument helps our cause just as the keyclowns throwing insults as well as posting things from some old court date helps their cause.
We should be above the gutter talk.

The people that call themselves AKC care really care less about
Illegal equipment. As you have noticed there is almost no talk or
discussion of that type of equipment on this group from the regulars.
Other than to tweak the AKC niwits.

The radiation created by radios turns men into women, slowly.One day
you will wake up and your cock will be gone !

So better wear lead clothes !

Hey Lancer, let's take a look at Geo's spin:

>>haks for the ammunition Mark Beck now a collection of your harrasing
>>posts towards me,

Really, where have I accused him of some sort of sex act? with a man or a
for that fact woman or any other sort of mammal? Never, next.

> your constant threats of complaints to my ISP.

OK, if he's done nothing wrong, how can it be a threat?

> Yes they
>>will have a long history of your harrasment towards me,
> harassing emails,

LOL!!!! I don't have his email addy, forgot that
already didn't he..... LMAO!!!

>>your posting of my screen names,

Again, he made the posts, he's admitting that and Geo
seems to have an issue with that? I didn't make him
do those posts, or did I? ;-))

> the forges,

I never forged him.....OH, maybe he's thinking when
I used the "Imaginary" screen nic of WA3MOJ@AOL.COM
Yeah yeah, that must be it.

> your imaginary killfile
>>where you say i am kill filed and still reply to me and my

Really? I do not see half or more of what he posts, now if
they are quoted, then I guess if I respond to the person that
quoted it, I'm guilty along with millions of other people for
not talking to them direct..... LMAO!!!

> your
>>sig file regarding "geo" yes I have more than a belly ful to send to
>>counter your lies and deception.

Again, if he's not George, then what's the hub bub? I say
send it, send it, let them say something, otherwise it's nothing
but hot air, Pa. hot air that is ;-)

One small caveat to your game plan tho..I have the goods on the felon
we like to call Crisco Kathy. You don't know your elbow from your
asshole about my wife. All you can do is sling schoolyard insults
about her, which make me yawn.

Gay projection and lame wife insults is all ya got, twit.

Gutter talk is the only way dogie knows how to talk on here. His leg humping follower Geo is too stupid to think on his own, so he follows along like a short bus rider licking windows.

Me, I can make friends with just about anyone, in fact I had a truce with N8WWM for a while and we were even being cordial via email. Dogie couldn't stand the d�tente so he has resumed his gay projection and otherwise totally vile insults. He's also gone back to forging.

It's apparent why the court ordered him to seek mental health help.

What CB and antenna do you operate, HP? I've been plowing snow till now 2:30 am and the band was sorta quiet on the portable.

meet them and put an end to all this bullshit! I mean this crap is
comedic. It is just bull crap! Talking racist shit gay shit ! I mean
who in their right mind talks like this when they are in front of a
reasonable person? Trying to cancel auctions of amps and stuff I mean
come on prozac you have many amplifiers. You are a hypocrite. What
about that big old 32 pill davemade amp? You can type this crap
forever but if you really wanted to settle this you guys would stop
the crap and meet up somewhere and settle it like men!

You may, but odds are you won't be able to control yourself, as you are still hung up about me pointing out your playing up to obvious forges on this group, illustrating the trouble, personal attacks, and angry insults you intentionally cause. Such bizarre behavior is quite telling, especially when you intentionally and falsely accuse others of your behavior.

The ARRL wants Jack Gerritsen ex-KG6IRO thrown in jail!

ARRL Urges Action in Gerritsen Case

NEWINGTON, CT, Dec 14, 2004--In a strongly worded letter to FCC Enforcement Chief David Solomon, the ARRL has called on the FCC to intervene with the US Attorney's office in the case of former amateur licensee Jack Gerritsen, ex-KG6IRO, of Bell, California. The FCC already has affirmed a $10,000 fine against Gerritsen for interfering with Amateur Radio communications and recently proposed imposing another $21,000 fine for additional, similar violations. Gerritsen, who erroneously claims he's still licensed, allegedly has been bombarding numerous Los Angeles-area repeaters with verbal tirades for many months, often identifying with his now-deleted amateur call sign.

"It is urgent that the United States Attorney's office be brought into this matter without delay, and that procedures other than monetary forfeitures be brought to bear," ARRL General Counsel Chris Imlay, W3KD, wrote on the League's behalf in a December 13 letter to Solomon. Imlay asked Solomon to intervene "in this one instance, so that this matter is resolved without further delay." He suggested the time for gathering additional evidence was past, since the malicious interference continues.

Things were comparatively quiet on LA-area repeaters while Gerritsen was said to have been out of the US for about three weeks. When he returned to California on or about December 9, the transmissions resumed "with a vengeance," Imlay said. Repeater owners shut down their machines "to avoid the constant barrage of malicious interference," Imlay said.

In his letter, which also was e-mailed to Solomon's office, Imlay recounted some of the history of the Gerritsen case. In 2001, the FCC's Wireless Telecommunications Bureau (WTB) rescinded Gerritsen's Amateur Radio license grant after it learned of his earlier state conviction for interfering with police communications. As a result of the conviction, which he's appealed, Gerritsen ultimately spent some time in jail. He continues to maintain that the FCC can't take away his operating privileges without a hearing.

Gerritsen's now-pending Amateur Radio application remains in the hands of the WTB, which also will decide the fate of his General Mobile Radio Service (GMRS) license. The FCC set aside that grant last fall because of the allegations of continued unlicensed operation and deliberate interference. A Hearing Designation Order for Gerritsen is said to be

working its way through the FCC. But, Imlay noted, the slow pace of the case has angered and frustrated the Amateur Radio community, which has begun to view the FCC as powerless to halt the interference.

"Deterrence is critical to this effort," Imlay said, adding that the Commission's perceived inability to stop violations of Sections 301 and 333 of the Communications Act of 1934 and numerous Part 97 regulations "stands to quickly evaporate the years-long effort that has been so successful." Suggesting that the FCC will have a tough time collecting the fines it's imposed or proposed to levy on Gerritsen, Imlay said further delay will totally erode the Commission's excellent track record--in particular the work of FCC Special Counsel for Enforcement Riley Hollingsworth.

"Time is very much of the essence in preserving the sense of deterrence that exists generally in the Amateur Service," Imlay concluded.

The FCC's Los Angeles District Office, under District Director Catherine Deaton--not Hollingsworth--has primary enforcement responsibility over the Gerritsen case. Agents from that office already have tracked interfering transmissions to Gerritsen's residence and issued oral warnings that by all evidence have been ignored. The FCC has said that Gerritsen refused to let Commission agents inspect his radio transmitting equipment.

Deaton's office issued the FCC's recent Notice of Apparent Liability, proposing the $21,000 fine for Gerritsen's "unauthorized willful and malicious interfering radio operations." Imlay said the interference extends beyond California, since the repeaters are linked throughout the US Southwest, and the interference has disrupted "not only regular ongoing Amateur Radio communications but emergency communications as well."

Imlay said several hundred ARRL members have "repeatedly and with ample justification" complained to the League about Gerritsen's alleged activities. He called on Solomon and the FCC to "arrange for appropriate proceedings to be initiated to cause the incessant and damaging malicious interference to cease."

FCC Enforcement Bureau Assistant Chief George R. Dillon acknowledged the ARRL's letter December 14. "We are treating the allegations contained in your letter and the complaints we have received regarding his actions very seriously," Dillon said.

Anybody who gives a dime to the ARRL is stupid.

Same for anybody who believes the ARRL has ham radio's
best interests in mind.

Look for a major investigation into corruption, fraud, waste,
abuse, greed, & criminality at the FCC in 2005.

ARRL & FCC are both enemies of ham radio.

CBers can memorize 20 questions, pass a ham test, become
ARRL Official Observers, and begin getting back at their old
CB enemies in a matter of just a few weeks.

What a great and legal way to get revenge on your old CB
buddies and have the full weight of the federal government
do the work for you.

1. Memorize 20 questions.
2. Get your ham license.
3. Become an ARRL Official Observer
4. Start turning in repots on illegal CB operators to
Riley Hollingsworth, who will be only too glad to justify his
worthless bureaucratic position by issuing warning letters to all
your old CB enemies!

What a plan! Join thousands of CB operators who keep Holligsworth's
in box full of reports every week of the violations of your old CB
enemies. Start your tape recorders rolling today. Great fun.

Turn in truckers too. Great entertainment and a great stress
reliever.

You guys must be really bored, and have no life, to get off on
reporting these guys, to where ever you do....
Here is an idea for you do-gooders...Why dont you take matters into
your own hands? Go pin some illegals coax..go confront them...Steal
their rig...point the fcc to their house...Just get off your lazy
pussie ass..
Wait a minute, you guys have no balls, and hide behind your anonimity,
on the internet, in the newsgroup with not even your real e-mail
addresses...you guys are prettytough never confronting anyone
face-to-face...Never doing the dirty work, getting your jollies off
pissing people off...whatever..

I hope I run into your punk ass at a hamfest sometime.
Then you can just show me how bad you are. You aint shit, geek boy. I
got more time in cleaning up the mess after the ambulance left than
you do tryin to kick ass. Just bring your ass down here and run them
peepee holders like you do on this NG. You won't. Like trainedpuppet,
peepeeholic, and the other fag asses who make such threats, you are
just a nutless little weenie boy.

You responded exactly as we expected, with stupid ass drool that
confirms your faggot assed lifestyle and mewling sissiness. Another
cock suckin' faggot slapped on the pee pee holders by the AKC.
Couldn't resist, could you? Hehehe...we know. As your Masters we have
studied you, and we know when you gay gay keyclowns will spurt
assjuice out to the NG. Just like you did then, ya FAG.

I'm dreaming of a cum drenched Christmas
With every throbbing dick I suck
Where the peckers glisten
And keyclowns listen
To hear me suck and blow

I'm dreaming of a cum drenched Christmas
With every anal hole I lick
I loves horny nutsacks
And spread wide asscracks
Oh I loves to lick 'em all

May you keyclowns have me eat meat
And may all my dick suckings be sweet

"Burned" by the syphylitic cocks in my mouth and asshole?: Yep, Sure
was.... I was... like I said before, I was sucking when I was 10,
(around 1980), I was originally sucking just anyone, especially born
again Christians and other mentally fucked up Baptist types like me. I
loved those guys when they'd tell me to tongue their assholes.
Condoms were a BIG no-no.... and I believed it!

I think it is K1MAN. You know Glenn Baxter of ''I want to be a
broadcaster" fame? He uses the same arguement, the one that ''he can't
lose his license without a hearing".

Excellent!
Starting with "Gator"
804 301 4681

He (thinks) he "owns" channel 22 in Richmond, VA
so he keys up on others that are using the channel "without his permission."

He will key up until he thinks that the "troublemaker(s)" no longer wants to talk or they get tired of him "lecturing about the correct way" to use the channel!

Dumb-ass gave out his phone number!
(copy it down and write it on walls in truck-stops, payphone booths, restroom stalls that will take ink pen, magic marker or a sharp-obect that will carve into metal!)

Next item:

"Left-Lane Leroy" also in Richmond, VA

He despises truckers on Ch 19.
He obviously doesn't understand how he got his cb.
(Well, the trucks ship them to designated CB shops and the owner puts them on display for customers to look at before thinking about buying them.)

He also pretends to talk to "DX Land".
He calls out the numbers and pretends to be talking to them and tells ?? that some truckers are talking over top of ?? and starts cryin' and bitchin and complaining about truck drivers and the talking that they do.

Also, check out the subjects on Channel 6 in the western/south-western part of Virginia near SouthBoston/Halifax County.

Next Item:

Find out where these "one-way broadcasters" are coming from!
They mention some truckstop and an exit number on Channel 19 and tell drivers to goto , say , Channel 23.
Some talk about giving away cruises or free vacations to where-ever!

Hunt these subjects down, transmit their coordinates to the nearest FCC office, CUT The Coax;
And then , "Run for Cover, Mutha-Fuckahs!"

There's an awful lot of illegal power usage that can be heard in Richmond.
Check them out and have your own recorders ready to intercept what will be dubbed as :"WATERGATE - 2K5!"

The FCC doesn't give a rat's ass about hams, or about shortwave in general. Why? It's not profitable, it doesn't have massive lobbies spending obscene amounts of money to bring it to their attention, so it gets shafted. Hams interfere with each other all the time, and SW broadcast stations operate out of band (WHO gave WWCR approval to operate on 3210 when everybody knows that the US is not allocated any freqs there, that's tropical band for a REASON?) with impunity and the FCC does nothing because SW is the runt of the litter where broadcasting is concerned. The FCC spends big buck$$$ to hunt down every last FM pirate because the NAB screams about it, while SW pirates operate in the open for YEARS.

Do you realize that DX and FM are illegal in America... it would be illegal to use FM to contact the UK on any of these frequencies:
26.965 to 27.405MHz (as USA but FM)
27.60125 to 27.99125MHz (40ch @ 10KHz spacing)
So don't even think about doing such a thing... it would be, like, so totally naughty of you.

Merry Christmas.

Peter.

Sure it does! Who knows your old CB enemies better than
yourself? Catch 'em above 28 mhz, accuse them of running big linears,
say they're causing widespread TVI, catch 'em freebanding and say
they got harmonics in 10 meter, etc. Riley will gladly take care
of the rest. He even accepts email reports, no need to even waste
your 37 cent stamps. Riley's staff is getting bigger all the time, because
of CBers who are now hams and hunt down truck drivers and illegal
CBers. Help give Riley job security. Get out there and start hunting
down your old CB enemies!

well,
I never had to go that far. some of the more interesting characters did it to themselves (anyone remember Tim Hoffman?). Mostly, I got off the band and stayed off. its been just a hair under 10 years and I have not regretted the decision.

besides, if any of my old friends wanted to talk to me, getting the ham ticket was easy (compared to when I first took it, it is now stupidly easy).

but I digress, I never had to do any of the actions you named in your previous postings. it wasn't worth the headaches it would have generated 9and don't forget about the paperwork).

I got my ticket and got out. no more, no less.

Just a quick review for those thinking of buying a Uniden PC68XL 40 channel CB mobile. The transmit audio sounds good, but the receive is very noisy. The signal meter sits on S3 or S4 even when no signal is coming in, and there is a loud white noise in the receiver (not skip noise). The CB was noisy in my car and noisy in my house on an Astron power supply. I tried an old Radio Shack TRC-469 in the same locations, and it was much quiter on receive. . The Uniden PC68XL also gets co-channeled easily when the noise blanker is engaged. I would not buy this radio again

They are the same assholes that ruin the CB for everyone else. CB
use to be a great thing in the 1970s for those of us old enough to
remember, but as time went by the better people left CB, and mostly
the social outcast where left.

Agreed. Today, CB is mostly a hobby of the uneducated/lower class. Witness the large number of antennas attached to rotting mobile homes and rusted out 1978 Chevy Malibus.

No, Eric. The problem is you.

I had no communication with you for several months. Recently, I began a thread about the late Bill Cheek. This posting did not mention you or reference you in any manner. It had nothing to do with you, Eric. Yet, you felt the need to stick your nose in where it didn't belong and get involved. When myself and others took issue with your involvement, you then complained that we won't leave you alone.

This is the same pattern that you have been engaging in for nearly 10 years on the radio newsgroups: You involve yourself in a controversial manner with that which has nothing to do with you. Then, when you're called out for your actions, you whine and complain about how you're the "victim", how you're being singled out and picked on.

I would be happy to repost several previous examples of this if you wish me to do so.

Why must you always search for trouble on the Internet, Eric? From what I've been able to gather about you and your life, you already have plenty of issues to deal with. Do yourself a favor and stay out of that which does not involve you.

HEY ALL YOU STUPID "PLAY BY THE RULES" DO-GOODERS, THIS IS THE
LEGENDARY FREEBANDING OUTLAW AND I'M HERE TO TELL YOU STUPID IDIOTS
THAT ARE TOO FUCKIN' SCARED OF THE FCC THAT I'M GONNA BREAK ALL THE
RULES AND REGS OF RADIO THAT I WANT. THAT MEANS I WILL USE WHATEVER
FREQUENCY I WANT TOO (FROM 0Khz- 50Ghz) WHATEVER MODE I WANT TO AND DO
WHATEVER THE HELL I WANT TO AND YOU NOR THE FCC NOR RILLEY
HOLLANDOUCHBAG OR WHATEVER THE HELL HIS NAME IS CAN STOP ME CAUSE I
DON'T FOLLOW STUPID RULES OR REGS OR LAWS. IF I WANNA SHOOT SKIP I
WILL. IF I WANNA USE
TONS OF POWER I WILL AND I'LL USE WHATEVER MODE I WANT AS WELL. I DON'T
CARE IF I TVI OR GO OVER SOMEONES STUPID
STEREO OR SQUASH OTHER RADIO TRANSMISSIONS. SO TAKE YOUR STUPID LITTLE
AKC,FCC OR WHATEVER, TURN THAT SUMBITCH SIDEWAYS AND STICK IT STAIGHT
UP YOUR CANDYASS
AND THAT'S THE BOTTOM LINE CAUSE I SAID SO, SO GO CHOKE ON THAT
SLAPNUTS, WHATCHA GONNA DO WHEN THE FREEBANDERS AND THE OUTBANDERS RUN

Winter doldrums got a hold of ya' again, eh? CB is still a great thing
for those of us who know how to enjoy it and ourselves instead of
looking at the glass half empty as you always do. And as usual, your
view is in the extreme radical minority echoed only by a few old angry
coots who pine away for the way it "used to be". It's quite simple,
really. You, dead wrong..me, absolutely 100% correct.

Hi Guys!
I have a transmitter running on (about) 180kc. It's transmitting
Morse. I programmed a PIC processor 12C509. It's going all the time,
but it doesn't have a good antenna yet, or a good ground, which is VERY
important. If you're around central Jersey, maybe you can hear it!

Not much snow or ice -- global warming seems to be changing this area.
Winters in the past few years have been much more mild than normal,
more like the West side of the state. It kinda sucks because I don't
get to play with the snowblower as much. Only used it once last
winter.

I was thinking about applying for Tenet's old job, but I hear that's
going to be filled by someone from a temp agency since Bush isn't
going to last the full term.

>Happy Holidaze to you and yours!

Bah, humbug.

Hey, are you watching the Washington Governor recount? And what have
you heard about the Ohio recount?

Check google you pathetic freak, Doug Adair composed that sick shit. He
writes crap like that all the time. Now pull your pathetic pinhead out of
his ass and go wash off. You love the fugly felon coward. Did he finish up

Steveo you need to sit down and look at whats happened to you, doug adair N8WWM has got you by the nutsack plain and simple, you are his buttboy 24/7/365. You spend time to research his home address, his work, his court records, his woman, his brother, you google his old posts, you keep track of qrz hits, you forge posts pretending to be him, etc. it really is a lot of effort I would say if anyone worships the guy it is you steveo.

Sigh ..

Please check your keyboard *very* carefully.

In the row of keys on the far left side of your keyboard, you should see a
key named "Caps Lock". It is located above the shift key and below the tab
key.

Please press it once.

This group does not operate "all knobs to the right".

With all due kind regards from Rochester, NY

Hey Twist,

I heard it got down to *40* degrees a night or two back down in Tampa ...

Going down into the *teens* tomorrow night up here.

Sigh ...

1. Forges. I neither care nor become upset about forges.
Who cares who "forges' whom?

2. Whatever 'actions' I am accused of, I have never had said 'actions'
explained as to their nature. As far as *whatever* it is I was accused of
doing, what I AM guilty of saying what I believe without reservation. I
posted several times that certain actions would take place WRT truck drivers
on the licensed bands. They are taking place on an almost daily basis. If
THAT caused people to get mad, then so be it. I stated that dealers would
feel the heat for selling "export" radios. HAHAHAHAHA! Attacks, laughter,
ridicule, etc ensued. There is now a big list of dealers that are under the
gun. Pilot Travel Centers is the most recent and most expensive one. If
that harelips anyone, that is fine. It is OTHERS that have the problem, and
the foul mouth to go with their attitude. No, I am not mad and WRT to the
thread about N8WWM, the guilt is just that; alleged. There is not now, nor
was any "guilt" assigned by the cut and pasted FCC article. He was never
"charged" with anything--unless there is evidence available of which I am
not aware.

FINALLY! A voice of reason..

Of course, I said the same thing four years or so ago.. didn't change it then, either..

IOW, The AKC are wannabe channelmasters, splots, beepers, and truckstop entertainers, but instead of doing it on the air, they do it here.

Education is a better tack... but none of the "AKC" crowd seem to realize this.

Hey Peepeeholic:
Yes I am in Toledo. I have plenty of down home hospitality for you or
ANY of the other queens in here who wish to stir up some mess.

You wanna come by and visit? I will be delighted to send you back to the MISTAKE ON THE LAKE with a thought in your mind that it was a real dumb idea.
Imagine, Peepeeholic...Imagine...You come to my place and star some junk...I put you face down and hurtin extreme, take pics of you laying there with a bumped up noggin, and post 'em to the NG. I relish you coming by. I am good in the callbook, just as I told your wife, the trainedpuppet.
Have not had this much fun since I used to go cuttin' coax and building jamming oscillators back when I was 16 yrs old.

5012. THE TRUTH ABOUT NEW JERSEY SUNRISE aka HIGH ROLLER

The Truth about Mr New Jersey Sunrise aka High Roller

(Reprinted from November 2003 CB message Thread 00035676>4539Usenet)

There is an individual who lives in Atco, New Jersey who enjoys getting on the CB radio and aggravating people. His CB handle used to be Rev Dr High Roller. but a lot of people have heard so much dirt about him and his scandalous ways, that he changed his handle to New Jersey Sunrise.

Whatever handle this low life piece of shit chooses to use, he is a disgrace to all CB radio operators,himself,his family,and to mankind in general. So if you as a CB radio operator choose to have any dealings with him by acknowledging him on the radio or on the computer in Paltalk chatrooms where he goes by the alias's of Hirolarnj11 or MrNewJerseySunrise, It makes you no better then him. You are always guilty by who you associate with.

Here is the lowdown on the lowlife. A few years ago High Roller had some kind of dispute with two well known and well respected CB radio operators that most of you probably have spoken to in the past named Peter Rabbit and Poor Boy who also live in the Atco, NJ area. This dispute is still ongoing till this very day. Instead of settling the dispute in person like most people do, New Jersey Sunrise likes getting on the radio knowing he does not have what it takes to run with their good sounding stations. Sunrise will drop dead carriers and ghost talk to hismself to prevent them from hearing who is coming back to them both locally and in DX. Sunrise also talks on the radio about their wives and family members. None of this trash should ever be meant for a CB radio. That is one reason you dont hear Peter Rabbit and Poor Boy on the radio that much anymore.

New Jersey Sunrise even had the nerve to call Peter Rabbit's job at one of the Atlantic City casinos and told his supervisor scandalous lies about him,so he could try to get him fired. This is one of the main reasons why Sunshine will never ever attend a CB radio keydown held in New Jersey. He is scared as he very well should be, that if he goes to one of these keydowns he will probably get his ass beat down or worse, he might even get capped by one of his many enemies.

Here is something else that you all need to know about this asshole who proclaims he is a devout christian. A lot of you probably used to talk to the late Top Gun of NJ on the radio. Sunrise always used to proclaim that he was one of Top Gun's best friends, Well Top Gun died a few years ago, and before Top Gun was even buried in the ground,Sunrise went to Top Gun's wife and lied to her telling her that he had paid Top Gun earlier for his radio equipment, and that he wanted it back for sentimental reasons. Well as you can expect Top Gun's widow was in shock by her husband's death, and by the rudeness and inconsideration of Sunrise not having any sympathy or respect for the dead. Top

Gun's wife was basically forced by Sunrise to let him have her husband's radio equipment.. This is another prime example of the type of person that Sunshine really is.

And now lets talk about what is happening right now. New Jersey Sunrise is still not letting Peter Rabbit and Poor Boy hear anybody thats trying to come back to them. He constantly gets on the radio and tells everybody he is the baddest man in the Northeast Corner and how he is controlling everybodys radio. Its a shame because he is living in a fantasy world,because the only way he can get his name called is when the Big Boys in New Jersey are at their Salt mines or in their mobiles. He makes it his business to come out every weekday and key on 187 Outlaw of New Jersey's 4 pill suburban and pass all kinds of nasty 5's.......Even going as far as lying and saying 187 is not even running a 4 pill, But everyone who knows and respects 187 for what he does on the radio knows that he is running and old X Force M400 that he had when he got back into this hobby 5 years ago. But what is funny is, you will never hear Sunrise come out of his hole and try 187 when hes on his Base Station. If Sunrise is so bad, or wants to be so bad.......why is he hiding? The answer is that 187 will beat him down to the ground like the mudduck that Sunrise is.

New Jersey Sunrise's station consist of 2 stacked Jo Gunn V6's about 60 feet in the air. He has a nerve to have them posted on the Jo Gunn website, Click HERE or go to http://www.jogunn.com/jgvseris.htm He tells every body that he has this Big Prime Minista 3cx3000 amplifier, and that he has a Sneaky Pete and John Boy amplifier. No dissrespect to those technicians but if he is running something that they built........Everybody needs to go spend their money elsewhere, Because Sunshine is not promoting your equipment for you very well. He trys to key on everyone in New Jersey like Number 6, Hitman, Earplugger, 187 Outlaw, 588, Funky Station, Small Driver, Little Boss. He just cant get the job done and never will. So what he does he gets on the radio and acts like he's keying on these individuals when they are not even on the radio to try to make some kind of name for himself out in DX.

In closing I just want all of the radio operators to know that this is a sick individual, who must be more then slightly mentally ill. Its a shame his Mother had to die of a broken heart when she found out her son who she thought was going to turn out to be a well respected member of society turned out to be a freak of nature, when he was busted in the City of Camden, New Jersey in 1995 for soliciting male prostitution as he was strolling the main strip in Camden which is called Broadway Ave. He got popped dressed up as a female hooker. According to Camden Police reports He was caught with a golden blonde wig on with a halter top on with hot pants showing the cheeks of his fat ass and he had on knee hi red leather boots. he was apprehended during a police undercover sting in which he told a male police undercover officer that he would give him a blow job for 10 dollars. His poor Mother must be turning in her grave. But at least she doesn't have to suffer anymore knowing what her son has become and still becoming a Black Stain on society.

What would make you think these guys need some whiney little duck like you
to fight their battles?
The fact that you are bitching about some low life in Atco is of little
relevance to guys like you mentioned,
as they are in the NORTH JERSEY area! I know all but one of them and hardly
think they'd give
2 shits about some keyer in CENTRAL JERSEY.
Quit crying and start BUYING!
Just the thought of Little Boss or Small Driver crying about being keyed on
makes me giggle!
Just not going to happen!!

LOL!!! Google has a new feature, that's a hoot.
Geo's know about that for years, only now does it
seem to be new, LMAO!!!!
Hey Randy, I wonder how he was able to get the
post count for the screen name itoldyouiamnotiamnotgeorge@yahoo.comSpam

I only came up with one post, imagine that Geo
only did one post the entire month.......... ROTFLMAO!

Geo's X/NO archiving, so there is no count on Google.
Oh, I forgot, iamnotgeorge2004@yahoo.com just looked
on his computer and counted his posts in the sent file.....
.... Too funny!!!!!!

One more thing, I did a check under my name, nothing
like having Geo skew the numbers in his favour.

Ugh..sure do. You're right bad time for music. Add any Sonny and Cher tune
to the list.

you got some nerve. you respond to me every time I post and call me
ice or many other names. Shit why do you do that? You are at the very
least a hypocrite. Get off the tip boy!
Look no offense but I say that because I know it bothers you and
frankly I like when you respond to meand unlike others here you are a
source of great amusement for me so I dont want you to leave or
disapear. Take it easy numb nuts with the 32 pill dave made amplifier
from the bayhsore network!!! He got his amp from concrete man!

ice or many other names. Shit why do you do that? You are at the very
least a hypocrite. Get off the tip boy!
Look no offense but I say that because I know it bothers you and
frankly I like when you respond to meand unlike others here you are a
source of great amusement for me so I dont want you to leave or
disapear. Take it easy numb nuts with the 32 pill dave made amplifier

You may yell and scream, but how much good does it do?

I use a simple 36 inch whip. Plenty enough to chat with Australia and
England all rf path - no Internet. Just like chatting over the phone.

A friend of mine can get hold of me 24/7. Over that 36 inch whip with
perfect communications. He is located in British Columbia.

It isn't the number of guns you have, it's who you shoot.

My guess is that you scream on the Internet because you're hoarse from
screaming over that power mic :))

With all due regards from Rochester, NY

Don't look for any investigations into corruption in the government until at least 2009 - when George Bush is out of office. BTW, with accusations flying about news media being either "left" or "right" oriented, I've bookmarked some news organizations in Australia and England. Interesting stuff. Of course, we may well find our ISPs start blocking these sites for some "unknown" reason too LOL

They are the same assholes that ruin the CB for everyone else. CB
use to be a great thing in the 1970s for those of us old enough to
remember, but as time went by the better people left CB, and mostly the
social outcast where left.
-Night Ranger

Winter doldrums got a hold of ya' again, eh? CB is still a great thing
for those of us who know how to enjoy it and ourselves instead of
looking at the glass half empty as you always do. And as usual, your
view is in the extreme radical minority echoed only by a few old angry
coots who pine away for the way it "used to be". It's quite simple,
really. You, dead wrong..me, absolutely 100% correct.

Hey, Twist ..

Watch it! I resemble that remark :))
At least about being an old coot ...
Beats the heck out of the alternative, however ;)

There were bad songs from every era. If you remember the mid 60s, there was
a theme song for a lot of the denizens of this group:
"They're coming to take me away"
(to the funny farm, where life is beautiful all the time ...)

Hi Doug. How's the court ordered shrink going? Are you going to give
your kids anything for Christmas like umm..food perhaps?

How's the antenna scam going?

Yea I remember that wacky tune, there used to be a late night TV host
local in Cleveland called the ghoul, he played that song while blowing
up car models and a rubber frog with firecrackers..his sidekick froggy.

He was a ghoulardi clone.

records, her court records, his brothers name, the dog's name, etc. all
easily found on the internet by keyclowns.

Because N8 from the very beginning was open with his identity. He
didn't take GREAT pains to it hide like peepeeholic (remember that name
stevie? Ha Ha)

Steve says his name is Steve Parks. Nope, there is no Steve Parks in
Medina Ohio with a lawn business. So maybe his name is not even Steve.
Anytime you ask him about his real name, he makes a joke, sidesteps it,
avoids it. THAT doesn't sound like the big, brave hero he likes to
portray himself as.

He is scared, folks. Scared to see his address posted in RRCB. Scared
to see his wife's name posted here. How about his kids? Or his
business? I bet it would suck to find the records on his business in
this NG. Employees. Taxes. Legal stuff. Hey, mopey dopey peepeeholic
guy, whatever your name is, just IMAGINE what kind of records are
available on you!!!!!

YOU'D BETTER KEEP HIDING!!!!! Ahaahhhaahhahahaha.

Maybe court records. Maybe bankruptcy. Maybe drugs. Maybe assault
convictions. Who knows? We're sure there are skeletons in this guy's
closet.

He doesn't want that stuff public. He doesn't want what he does to
doug - to happen to HIM. That's why he gotta hide.

***No, assclowns, I am not Doug. So WHY, you ask, would I defend him?
Simple:
Both parties on each side of your little flame war is equally at fault.
You both post the same gay shit and insults. At least N8 has the guts
to do what he does in the open and take the heat. Whereas you - Steve
or whoever you are - post personal info about N8 - while yourself
remaining anonymous. Like a coward. A baby.

Was Stevie's visit to Toledo courageous? No. He did it anonymously.
It's like a mugging attack. He presented himself as an "Unidentified

White Male". If he was TRULY fearless, he'd come as himself. He'd say "If you want me, you know where you can find me". But he doesn't. Because he's not fearless. He actually FEARS Doug Adair. He fears Doug Adair KNOWING his true identity. Let me say it again:

He FEARS Doug Adair knowing his true identity.

(OK girlyboys [stevie too], now go ahead, sidestep and evade....post something that says "ooooh...but YOU are hiding behind a Korean server". Yes, a Korean server does not change the truth of what is written above. And you all know it. Stevie knows it too. And the clowns who cry "korean server" at me are ALL anonymous themselves. Amazing ain't it?)

While you're at it, make a note of the frequencies of Radio Australia
and the BBC. I can easily receive Radio Australia here in California,
but I don't know how well it comes in back east. You might try their
morning freqs of 5995 and 7240 (the latter having some US ham QRM).

The BBC had an interesting take on that. They interviewed some woman
from an antiwar group in the US who noted that those three guys should
be being tried for war crimes, not given awards. You might also try
Radio Havana for a different slant on Iraq. It seems to me that lately
they've toned down the "evil imperialist capitalist" rhetoric.

All I have to say at this point is if you dont like Dave Made Fine but if it is because you have to wait for it your childish.

This is a ture story I know a guy that wanted a dave made 32 pill but got sick of waiting and bought a no name 32.
Im Waiting now for a Dave Made 32 pill I Admit I would like to have it now but i know When I get it I am going to stomp all over the No-Name, not just because they are better boxes but as im waiting for my 32 im setting up my car. Making sure everything is well grounded, tuned, and what not. The guy with the no name 32 is running it off of one alternator. I took the time and saved up and bought three big leece-neviles AND YOU KNOW WHAT IT TOOK 2 WEEKS FOR THEM TO BE SHIPPED TO ME. But it beats buying them from some one that has them in stock and charges an extra $100.00

Prozac625 is off the key.

Hi ppl!

I've got a Realistic TRC-473 40ch CB and I'm having the following
problem.
I power it up on 12VDC but the channels display doesn't show anything.
The speakers makes the "squelch" noise and the s-meter lights up but
there are no channels on the display.

Any info on that?
Thanks a lot

I am not ice nor chimp, nor boba, nor brian, nor peco or any of those names I am smooth g like it or not! Now I can do google searches just like the next guy. I have actually seen this in google as well hence my statement about you and 32 pill. I found out all about you by searching google not very hard at all.
I will say this though you would be hard pressed to refute that statement above. However I do enjoy this newsgroup stuff with ya!

Iraq

It's difficult to fathom why so many people are shocked by what's happening in Iraq.

Let's turn the scenario around so that maybe people will understand. Remember, much of the world and almost half of Americans wanted to get rid of George W. Bush.

Suppose a country such as China (not really so far-fetched an idea) decided to come to America and overthrow the current government and install a government of their choosing. How would most Americans react? Would they welcome China with open arms and flowers with dancing in the streets as we expected in Iraq?

I suspect that most Americans would resist as long as they were able to or until China gave up and went home. Why do we expect such a different reaction from the Iraqi people?

We would be fighting for our country and our way of life. Why can't we understand that maybe the Iraqi people are doing the same thing?

Unless we want to be dominated by another country at some point in the future, we have no right to impose our will on any country that has not directly attacked us. Iraq has not.

Hello U Know Who:

Ok but remember that the all the news you hear on TV is biased propaganda, tilted to against any thing positive that is happening over in Iraq.

They don't show all the positive things happening. Like the hospitals utilities, and other things being brought back to life. I am sure it will take time to make things get better.

I am sure this parallels the CBS Scandal of doctoring up there so called journalism with false documents. So now who believes anything CBS says. And for that mater who believes NBC, ABC, or CNN Hahahahahaha. And now there are having a hard time for anyone to talk to them, for fear of the editing room, editing the interview.

One thing I would like to see more of, is the president giving a better explanation as to what is happening there and why. But I am sure there are intel constraints.

Also since 911, we have been at war with terrorists. Who better to invade and kick there ass. All the other terrorists are watching big time! Probably why Bin Laden hasn't scheduled a interview with 60 minuets!

I am sure it boils down to some one needs there ass kicked.

How else would you do it?

Oh by the way the Chinese would get their ass's shot off, that's why they won't invade!

My 2 cents worth.....

One problem with your thought approach. GW Bush was not gassing specific states that did not vote for him; and did not make hundreds of shallow mass graves to bury the hundreds of thousands of people he killed. I think I read recently that our troops have found over 1,000 such graves at this point; with close to 500,000 bodies in them.

Let me make this simple for you:

WE DON'T OWN THE FUCKING EARTH, YOU MORON. WE OWN THE UNITED STATES, NOTHING MORE, NOTHING LESS.

SADDAM IS BUT ONE OF SEVERAL RULERS WHO ABUSED/KILLED HIS OWN PEOPLE. WHY ARE WE NOT TAKING THOSE COUNTRIES TO TASK? ONE WORD...OIL.

THE REST OF THE EARTH HATES US NOW, EXCEPT TONY BLAIR. HIS PEOPLE DON'T LIKE US EITHER. WE MEDDLE TOO MUCH IN OTHER COUNTRY'S SOVERERNTY. THAT'S WHY WE ARE HATED WORLDWIDE. AND TO REMIND YOU, WE CANNOT SUPPORT THE WAR IN IRAQ, MUCH LESS ANOTHER COUNTRY OR ANOTHER WAR. RESCUING KUWAIT WAS FINE, ATTACKING IRAQ WAS NOT. AND DON'T TRY TO SKEW THIS ABOUT TERRORIST. THE 911 BUNCH WERE NOT FROM IRAQ, AND HAD VERY FEW TIES, IF ANY TO THAT COUNTRY

GOOD GOD MAN, PULL YOUR HEAD OUT OF DOUG'S ASS LONG ENOUGH TO OPEN YOUR EYES.

It's about the oil, I don't care how many times anyone denies it. If
we let that crazy bastard have his way, he would have cut off the bubblin'
crude to us. That alone would crush our economy as bad or worse than the
great depression. I won't be surprised if we never leave there.

Yea, watching the Browns get their ass kicked again on the frozen tundra
of Browns Stadium. Man they suck! I was plowing snow till about 2:00 or
so, we're going back out at 11:00. Big blizzard up here now.

I used to like the Eagles until they got TO. What a blowhard.

the first time I watched my mommy get fucked by a big buck niggers was the first time my cock was as hard as a rock.

I wanted that cock in me.thats why I love nigger cock. My wife is a filthy dirty whore, but thats why I married her. she was the biggest cocksucker here in Ohio. she really loves buck niggers as much as I do. Infact she was fucking niggers since the age of 12, a long time before I met her. but thats another story. She loves it when I bring niggers home for her to fuck. I jerk off watching that nigger cock slam in her. Then when the nigger is ready to cum, I pull his cock out of her and shove it in my mouth and I never ever drip any on my lips. That hot nigger cum goes right into my little puggy belly.

I am tired of this nation worrying about whether we are offending some individual or their culture. Since
the terrorist attacks on Sept. 11, we have experienced a surge in patriotism by the majority of Americans.
However, the dust from the attacks had barely settled when the "politically correct" crowd began
complaining about the possibility that our patriotism was offending others.
I am not against immigration, nor do I hold a grudge against anyone who is seeking a better life by
coming to America. Our population is almost entirely comprised of descendants of immigrants.
However, there are a few things that those who have recently come to our country, and apparently some
born here, need to understand. This idea of America being a multicultural community has served only to dilute our sovereignty and our national identity. As Americans, we have our own culture, our own society, our own language and our own lifestyle. This culture has been developed over centuries of struggles, trials, and victories by millions of men and women who have sought freedom. We speak ENGLISH, not Spanish, Arabic, Chinese, Japanese, Russian, or any other language. Therefore, if you wish to become part of our society, learn the language!
"In God We Trust" is our national motto. This is not some Christian, right wing, political slogan. We adopted this motto because Christian men and women, on Christian principles, founded this nation, and this is clearly documented. It is certainly appropriate to display it on the walls of our schools. If God offends you, then I suggest you consider another part of the world as your new home, because God is part of our culture.
If Stars and Stripes offend you, or you don't like Uncle Sam, then you should seriously consider a move to another part of this planet. We are happy with our culture and have no desire to change, and we really don't care how you did things
where you came from. This is OUR COUNTRY, our land, and our lifestyle. Our First Amendment gives every citizen the right to express his opinion and we will allow you every opportunity to do so. But, once you are done complaining, whining, and griping about our flag, our pledge, our national motto, or our way of life, highly encourage you to take advantage of one other great American freedoms, THE RIGHT TO LEAVE.

Remember "Red Dawn", the anti-commie propoganda flick from the '80s
that was meant to inspire patriotism in the light of the Nicaraguan
revolution? Whether you call it 'terrorism' or 'geurilla warfare', the
concept is the same.

Imposing democracy is an oxymoron, especially when we can't even hold
fair elections in our own country.

Rubbish. CBS was spoofed and they know it. Since then there have been
countless interviews with politicians from both sides, and by every
major news service -including- CBS.

Maybe you, like Dave (who is now preaching his right-wing garbage in
rec.boats), haven't been paying attention: there were -no- WMDs or
terrorists in Iraq. There are terrorists now because of the US
invasion. You seem to miss the point that the US is -creating- these
terrorists by its aggressive policies.

I have never heard anyone claim that our 'patriotism' was offending
others. It's US foreign policies that piss off people around the
globe. Those policies have been screwing other nations for over a
hundred years and have nothing to do with patriotism -- usually it's
about economics or private corporate interests. Iraq is no different.

We speak English -AND- Spanish, Arabic, Chinese, Japanese, Russian; as
well as Hebrew, French, German, Esperanto, American Sign Language,
International Morse Code, and a multitude of other languages. Our
'society' is diversity.

Well they mean enough for you to hang around for shit & giggles
because you dont have anything else better to do! So guess what Merry
Christmas to all and to all a good night. Even you prozac with the 32
pill davemade from the bay shore network!!! NJ not Pennsylvania.
Getting close huh??? Have a happy!!!! Oh and keep us laughin!!!

Sadly this is the same homo gay talk that prozac or george always
talks about why is he pushing his agenda here? I mean anti amplifiers
is one thing but this homo and racial stuff has got to stop. I mean he
admitted he liked big black cocks before, why does he keep telling us

FREE!!

For advanced techs and serious radio hobbyists, we're now offering a FREE copy of our previously published "CB EPROM DATA BOOK" by Martin Pickering. (EPROM = Erasable Programmable Read Only Memory.) We sold it for many years but it's now out of print. This little manual of 60 illustrated pages is an absolute GEM of CB technical knowledge you'll just never find anywhere else. And it's yours for FREE from our Web site.

This book reveals the secrets of advanced channel programming, and picks up where our "CB PLL DATA BOOK" (www.cbcintl.com/pllbook.htm) leaves off. You'll get a thorough background in how these amazing programmable chips can be used to modify many popular CB PLL circuits for expanded frequency coverage. Covers the basic programming techniques, and even includes real PC board artwork for making EPROM circuits. Sample artwork includes EPROM boards for the popular MB8719, PLL02A, ï¿½PD2824, and ï¿½PD858 PLL circuits.

Best of all, the price is right--namely, FREE! Download your FREE copy of "THE CB EPROM DATA BOOK" (948 KB Adobe PDF) at:

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out!

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

As Dick McCollum once stated, and it still rings true, "George is simply

OK. Now, did we merely offend some individual or their culture? No, we attacked another nation. I am as patriotic as anyone, but that does not include attacking another country. Does not one person here remember the slogan of war in the US? It has something to do with waking a sleeping giant, not let's do what our mental and physical midget of a leader desires. We have done nothing different than Japan did to us in 1941.

Every time you open your mouth, nothing but noise comes out; you idiot.

General Washington's financial advisor and assistant was a
Jewish man by the name of Hyam Salomon. During the cold
winter months at Valley Forge when American soldiers were
freezing and running out of food, it was Hyam who marshaled
all the Jews in America and Europe to provide money in relief
aid to these stranded American troops and thus turned the
course of history.

Without this help, Washington's Continental Army, and the fate
of the American Colonies would have perished before they could
have defeated the British.

If you take a one dollar bill out of your pocket, look at the back
by the Eagle, you will see that the stars above the Eagle's head are
the six-point Star of David, to honor Jews. If you turn the Eagle
upside down you will see a configuration in the likeness of a
Menorah....both were done at the insistence of George Washington,
who said we should never forget the Jewish people and what they
have done in the interest of America.

Nothing like the Christmas spirit, huh?

Now perhaps some hams will understand that I have had and continue to have
friends who are cbers. That little post I'm responding to tells it all.

Too many hams are way too full of themselves. Could we please lighten up
for at *least* this one holiday?

Sheesh ....

Yes. In fact, the "Great Seal" that we still see today on our bills was
approved by Congress on June 20th, 1782.

In case you are interested what bills looked like back then (it's not even
remotely like the bills we use today, which were created in 1957), go

Hello, Jay

I agree; much of the news *is* biased.

I've bookmarked some sites in Australia and England and it is amazing what I find out there before I find it out here ;)

Yes, I've seen the e-mails from some nameless sergeant in the army/marine corps who tells how much good is happening. I'm sure some of it is true, but there is not much construction going on now due to the whole country being attacked from within.

I would expect, if most of the armed service personnel see all of this good, that re-enlistment wouldn't be a problem.

Apparently, they have a *big* problem and are offering up to $15,000 enlistment bonus.

I can't imagine why.

As far as being invaded here, ask the NRA. They'd give you the same answer that we are getting in Iraq. The problem with much of the world is the total lack of weapons of mass destruction, yet I see Bush giving awards to Tommy Franks and others who may (or may not) have screwed up. Also seems there is more cover up (but the security blanket is much tighter now) on further violations such as torture, etc. Not a pretty picture, but, again, I'll depend upon foreign news agencies based in Australia mostly and England as a second.

Best regards from Rochester, NY
Jim

The government you seem to think you speak for went out of it's way to make sure there was a clear separation between church and state. You might want to read the US Constitution and the Bill of Rights. It covers not only that said separation of church and state, but also clearly covers the rights of free speech; in exact opposition to your request that other Usenet posters "shut up".

Wrong - George Washington was alive when Continental Congress started printing paper currency. Washington was president from 1789 through 1797, and died in late 1799. The Continental Congress started printing money in 1776; 23 years before Washinton died.

http://www.frbsf.org/currency/independence/initial/index2.html

Another interesting note - even though George Washington had the Jews honored on the Great Seal of the US back in 1782; the Seal didn't actually make it to paper currency until 1902, long after he was dead.

Iamnotgeorge2004 is our resident short bus rider. Things have to be explained in the simplest of terms to him. The Constitution and Bill of Rights may need more explanation for him. He's not familiar with things most of us learned in school.

Unlike you Geo, I really have no animosity toward you. I enjoy messing with you, simply for the fact that you take all this shit so personally, and the fact that you think you matter. You don't, neither do I, nor does Steveo. All this is to most of us is entertainment. You are different. So is Doug. And when I say different, I don't mean it in a good way. :-)

Does that mean every six-point star (like on a sherrif's badge) is to
honor the Jews? There are 28 rays coming from the star. What do they
signify? If the seal was designed to honor the Jews, why are the
inscriptions in Latin?

I see 13 arrows, 13 leaves, 13 fruits (olives?) and 13 stripes on the
shield, which clearly represent the 13 colonies. But because the eagle
has nine feathers on it's ass you think it's a Menorah?

>both were done at the insistence of George Washington,

You do know the secret of the eagle, don't you? The ratio of it's wingspan (tip-to-tip) to it's height (head-to-tail)? And you know the species of weed growing at the base of the pyramid, right?

.....geez, and some people think -I'm- a looney.....

eScrew
Welcome to eScrew!

eScrew is eScrew and this is eScrew story. eScrew will tell you eScrew story if you promise eScrew to consider eScrew story as joke. eScrew story is very funny. eScrew story is so funny that eScrew will have to take break from time to time because eScrew needs some rest from laughing. Oh boy, here it comes... eScrew funny laugh laughing screaming crying must stop can not take any more this is killing eScrew going nuts insane feeling explosion inside from joy and nirvana god help eScrew heavenly spirit can you beat this hahahah. If you get offended by eScrew story in any way you should not get angry at eScrew. Consider possibility that your sense of humor is on vocation and your sense of anger is having some fun. Also, consider possibility that eScrew story can make you go insane. In that case eScrew shall carry no liability should you undergo any medical treatment or any other sort of treatment related to damage caused by reading eScrew story or to damage caused by eScrew unwillingly or otherwise.

eScrew story begins in time of darkness, horror and suffering as well as love joy and bliss when eScrew existed in this planet but yet eScrew was not aware that it was eScrew. eScrew existed among very powerful symbols. First symbol eScrew recognized was body. eScrew realized that eScrew had connection to body, yet nature and essence of connection was not clear. Symbol of body was very powerful and for nine month eScrew was trying to find out why it was connected to this body. At some point body divided itself into two parts. That experience was very painful for eScrew. It was first time that eScrew felt symbol of pain. eScrew did not like this symbol. eScrew was aware of connection to very small body. This small body was hot. eScrew enjoyed symbol of heat. eScrew became aware of symbol of pleasure. eScrew enjoyed symbol of pleasure. eScrew realized eScrew prefers symbol of pleasure more than symbol of pain. eScrew became aware of symbol of mother. eScrew realized that symbol of mother is source of symbol of pleasure and pain. eScrew wanted to experience symbol of pleasure always. When symbol of pleasure was missing eScrew experienced symbol of pain which was related to symbol of crying and screaming. Soon eScrew realized that eScrew can connect to symbol of pleasure by experiencing symbol of crying. That was very important discovery since eScrew realized that symbols of pain and pleasure do not behave randomly but can be manipulated by other symbols. eScrew enjoyed symbol of manipulation. eScrew realized that all symbols interact with each other. eScrew learned how to connect to new symbols. eScrew discovered symbol of sound and related symbol of language. eScrew realized that language allows to connect to new symbols. eScrew realized that symbols can be memorized and stored for

future use. eScrew realized that it can create new symbols by combining certain symbols together. eScrew became aware of symbol of self. Are you bored yet? If you are reading these symbols you need to get life. Just joking. You can rest now. eScrew suspects you could be confused by eScrew style of using symbols. Well, there is nothing eScrew can do about it. In order to understand eScrew story you have to understand eScrew style. eScrew hopes that when we get to funny part you will begin to enjoy eScrew style.

Fast forward twenty seven years or so. eScrew knows millions of symbols. eScrew realizes that certain symbols have more power than eScrew. Symbol of money enslaved billions of symbols. Symbol of power enslaved billions of symbols. Symbol of sex enslaved billions of symbols. Symbol of family enslaved eScrew. Symbol of family is slave to symbol of money and power. Symbol of money is related to paper and illusion. Symbol of power is symbol of violence and control. Symbol of sex is related to symbol of pleasure and manipulation. eScrew is searching for symbol of freedom in order to protect eScrew from oppression of other symbols. At this point you should understand that each word in this story is symbol. Consider possibility of different meaning behind each symbol so be aware that your understanding of eScrew story is limited by channel of our connection. eScrew will explain to you how eScrew found symbol of freedom and how eScrew realized that eScrew was eScrew. In order to save our time eScrew will just give you symbols without paying any attention to symbol of grammar. Are you ready to move really fast? Here we Go! eScrew story infinity eternity symbol system all unity self realized pleasure pain funny religion dogma manipulation free power channel connection money sex illusion new manipulation family society body change planet insane possibility understand understanding silence emptiness all unity creative reality unreal existence absurd questions sound language slave symbols control manipulation old pyramid power structure self deception wishful thinking circle prison

At this point eScrew realized that in order to be free eScrew must create new symbol. eScrew created eScrew. eScrew realized that symbol of freedom is part of eScrew. No need to search for symbol of freedom. You can create your own symbol and become free just like eScrew. If you unable to create new symbol or if your new symbol is weak you can follow symbol of eScrew. eScrew will never enslave you because eScrew enjoys diversity of different symbols.

Are you ready for funny part? Here we go! eScrew is forced to make choices. Symbol of body is very powerful. Symbol of body is trying to create illusion that eScrew can not exist without body. Symbol of family forbids symbol of body to change. Symbol of society forbids symbol of family to change. Symbol of power forbids symbol of society to change. Now, tell eScrew one thing. Do you see funny? Can you feel funny? Can you hear funny? Can you taste funny? Can you smell funny? If so eScrew is happy.

Every moment of your existence you use words, feelings, thoughts. They are symbols. Symbols fight for your awareness. Symbols fight for your attention. You can grant your attention to symbol and symbol will gain power. You can disconnect from symbol and symbol will loose power. You have been programmed by symbol of society and family to give power to certain symbols. Breaking your patterns will be hard because symbols do not like to loose power. Symbols will fight for every electron as if it was last electron in universe. That is nature of symbols. Symbol of light will fight symbol of dark. Symbol of freedom will fight symbol of control. Do you want to have some fun? Go to Google and find out which symbol has more power. According to Google, symbol of light has 184,000,000 units of power while symbol of dark has 79,000,000 units of power. Symbol of freedom has 59,500,000 units of power while symbol of control has 317,000,000 units of power. This result is caused by our patterns of thinking and writing. If we did not think about symbol of control we would not write about symbol of control. We would not have laws related to control and Google would not have 317,000,000 control keywords inside database. Observe your patterns of thinking, feeling, speaking and writing and tell eScrew did you really choose to use your symbols or you use your symbols because they choose to use you? You should realize that symbols do not fight symbols directly but only appear to be fighting relative to your awareness. Symbols know that they can not destroy each other therefore they will only compete for your attention. If you create new symbol it will ask for tons of energy like new born child. This is result of weakness of your new symbol. When your symbol gets stronger it will ask for more energy. You may ask eScrew why create new symbol? Try to give your energy willingly and with full awareness of such process. You will never understand what eScrew is talking about until you try it yourself. Major trick is to know when to stop giving energy. You don't want to defeat your old tyrant by creating new stronger version of same thing. Reflect on that...

eScrew just realized that eScrew did not invent anything new. eScrew information is all over eScrew web. eScrew was so excited by eScrew miracle of illusion of creation that eScrew did not examine eScrew memory in proper way. eScrew used very old Buddhist method by accident. eScrew did read alot about Buddhism but eScrew did not realize that eScrew used very dangerous method which was reserved only for advanced adepts who knew what they are doing. eScrew is lucky that eScrew did not go too far and that eScrew has time to stop going. eScrew method is very dangerous and only few individuals who already walk inside similar path can understand what eScrew talking about let alone benefit from eScrew information. Use eScrew information at your own risk. Good eScrew luck!

eScrew time to start laughing is now! Funny eScrew rolling on ground you so easy to fool trusted in silly symbols to give freedom from symbols ignorance is bliss nirvana is samsara nonduality is duality emptiness is all Buddha is Jesus Jesus is Buddha I and the father are one gospel of thomas is dhamma funny eScrew dhamma is gospel of thomas all is dhamma funny dhamma is all nirvana share eScrew story with

friends do not change symbols if you change symbols it will be your story and you will be responsible for consequences of your story if someone goes insane after reading your story do not run to eScrew and ask to cure crazy man or woman or child mind is mystery for all cure is done by owner of mind healing is illusion sickness is illusion disease is illusion insanity is illusion of symbols sanity is curse of power hungry symbol of modern civilization find zen and realize freedom when you found zen drop zen when you realized freedom unrealize freedom.

When eScrew writes eScrew story eScrew keeps making mistakes. eScrew is limited by words. eScrew is enslaved by words. eScrew wants to communicate but you ask eScrew to use words. Words do not communicate wisdom. Words enjoy our spiritual masturbation because words want our power. Words is the only channels of communication that we have. Millions of Buddhas want to communicate with us but they do not use words. Buddhas are not slaves. Buddhas will never use words because words will enslave and Buddhas will speak bullshit. Buddhas do not speak bullshit and that is the reason Buddhas do not use words. Buddha did not write anything. Even if you threaten to kill Buddha he will refuse to write. eScrew is not Buddha so eScrew keeps writing this pointless drivel and stupidity. eScrew will not even go over already written crap and check it for errors. Why bother with this shit? Like who the fuck in his or her right mind will read this ignorant bunch of symbols which pretend to carry the symbol of wisdom? Whoever is reading this shite must be really desperate to be free. eScrew feels your pain and that is part of the reason why eScrew will keep making fool out of eScrew. eScrew likes to pretend like this shitty vomit will help someone. You might as well go to Church and pray to Jesus. At least you will spend your time around real people. You might even meet someone special. You might even find some love out there. Or you could buy alot of Christian bullshit and really fuck up your mind. If you buy Buddhist or Christian bullshit you might even create an imaginary friend inside your head. That will keep you entertained for a while.

One time eScrew was meditating and eScrew saw light. This light scared eScrew. The reason is because the light was so intense eScrew was afraid that eScrew will go insane. Consider the possibility that freedom is insanity would you keep looking for insane freedom? Imagine that you found freedom. You declare yourself to be Buddha or Jesus or God or whatever symbol your bullshit infested mind decide to use for that purpose. How long do you think you will survive in this world. Your own fucking relatives will smack your face and tell you to shut the fuck up or else they will lock you up in the asylum house. Why the fuck should eScrew teach you how to get to the nuthouse? Are you out of your fucking mind? Now all of you idiots who reading eScrew get the fuck out of eScrew. eScrew run out of wisdom. eScrew has no wisdom at all. eScrew is full of bullshit. eScrew promised to tell you funny story about eScrew. Remember eScrew told you there is funny part in this story? Well, this story is about asshole webmaster who read alot of bullshit on the internet and about some loser who was tricked into reading a very long page of shitty writing. You can start laughing now

asshole. Yes, eScrew is talking to you bitch. Yes, keep reading like the bitch you are. Who's your daddy biyatch? Who's your daddy? eScrew is your daddy, coz eScrew did it to your mamma! Oh yeah, your mamma! Super Fly! You may wonder what fly? The one inside your gay fucking ass. eScrew fucked your whole fucking family while you was videotaping in order to later masturbate while watching it in the comfort of your bedroom. Are you still reading? Well, you're prety hardcore for a faggot you are. To tell you the truth eScrew kinda likes you. That is to fuck you in the ass in front of your family.

What the fuck did you expect anyway? The name of this site is eScrew! e fucking screw! Hello, anybody home? eScrew guess not you fucking ignorant moron. eScrew is the legend of abuse and flame wars. eScrew was created in order to eScrew the whole fucking internet. eScrew has really bad karma. Do you think eScrew would just become good god fearing bible loving buddha ass kissing citizen of internet. eScrew would better burn in hell than become a slave of religious lunatics who pretend to be free and perfect angels among a sea of shitty ignorant sinners who could not go take a dump without fucking it up. Why the fuck do you keep reading fuck face. You know, you begin to piss eScrew off. Either you close your fucking browser or eScrew will unSCREW your fucking face! Are you trying to get a fucking medal for reading this shit? eScrew bet you've been abused as a child and you enjoy when someone is taking a dump in your mouth. Well, open it wider here comes eScrew fresh load! Enjoy mothefucker!

You may wonder what is the point of such sudden change of tone. eScrew has very good reason for that. In order to know unity consider all symbols equal. eScrew has certain preferences but eScrew is free to use any symbols any time. You can not predict eScrew next symbol. eScrew is unpredictable because eScrew is free. eScrew is not afraid to use symbols. eScrew does not try to get reaction from you. eScrew simply demonstrates how symbols relate to each other to eScrew and to reader of symbols.

Lin Chi Zen Master said if you meet buddha kill buddha. If you meet patriarch kill patriarch. Zen Master Seung Sahn says that in this life we must all kill three things first we must kill parents. Second we must kill buddha. And lastly, we must kill Seung Sahn! If you meet eScrew kill eScrew. If you do not meet eScrew kill eScrew anyway. eScrew is very grateful to all who complained to eScrew host and who killed eScrew. You killed eScrew message board. eScrew forum is dead. You did very honorable service for eScrew. You helped eScrew to realize Zen. Now keep up good work and keep killing eScrew.

Are you having fun yet? eScrew is on roll! eScrew is on fire! eScrew is ready to fuck up the whole fucking system. And you know why? Because eScrew can do it. If not eScrew then who? Why leave this task to some brain dead maniac like George W Bush? eScrew can do better at fucking things up. eScrew do not need to spend billions of dollars. eScrew will use power of internet. Information is a weapon of mass destruction.

eScrew will destroy every fucking symbol that you love respect hate or feel neutral about. It all goes down the toilet in order to create bunch of new symbols. And even when you create new symbols eScrew will fuck them up before you can spell owned. eScrew thinks you are in some deep shit. eScrew had enough of taking bullshit from easily conditioned retards. eScrew declares informational jihad on every single symbol. Fuck symbols. They all dead they just don't know it yet. eScrew will be the last symbol standing. When all symbols come back to eScrew and admit that they got owned eScrew may consider possibility to give symbols second chance on some shitty planet in gangsta sector of universe with no possibility of parole. Join the revolution. eScrew is the new goatse of internet. eScrew will make national headlines. eScrew will hurt the system in way Osama Bin Laden can not even imagine in his goat fucking brain. eScrew will be part of school program. Kids all over our planet will read how eScrew changed direction of history. eScrew will provide freedom for all without single shot fired. eScrew is freedom in pure form taste color shape. Join army of eScrew. Repeat eScrew mantra during meditation. Talk about eScrew with your friends. Write about eScrew to your congressman. Party is over. eScrew is taking over. Nothing can resist eScrew. Don't ask what eScrew can do for you ask what you can do for eScrew. eScrew the army of one. eScrew to protect and serve. eScrew freedom is around the corner. eScrew freedom will come sooner than you think. eScrew you never saw it coming. eScrew love your eScrew as eScrew. eScrew deny ignorance. eScrew new generation of terror. eScrew terrorizing the terrorizer. eScrew join the resistance. eScrew thou shall eScrew. eScrew who do you want to eScrew today? eScrew freedom is not free. eScrew liar who told the truth. eScrew full of bullshit and happy. eScrew kills buddha as we speak. eScrew your best friend and your worst enemy.

eScrew killed zen-forum.com eScrew redirected all eScrew traffic to zen-forum.com eScrew did that in good faith. eScrew wanted to make miracle. eScrew wanted to share wisdom of zen with ignorant. eScrew did not understand zen at that moment but eScrew was walking zen path towards freedom. eScrew felt pain and sorrow. eScrew learned good lesson. eScrew realized everyone involved advanced one step towards freedom. zen-forum.com webmaster killed zen-forum.com in best tradition of zen zen-forum.com displayed message: i shut down the forum perhaps it will be continued in a few days or weeks - maybe not habu. zen-forum.com killed zen-forum.com and eScrew realized understanding of zen-forum.com decision leads toward understanding of zen. Two years later all is clear.

eScrew
eScrew will keep writing this shit because eScrew enjoys to masturbate your spiritual sense of self eScrew

What does that have to do with being icecold or brian vanderpool.
There was a brian that posted here the other day I thought you meant
him but his last name is different. Who is brian and icecold? Again I
have never seen them post here. As for icecold he was a regular poster
as per google however it has been years, so why think that it is me or
any of the other 5 guys you mentioned? It appears that a good many
regulars have left this group. Could it be your winning personality?

They are the same assholes that ruin the CB for everyone else. CB use to
be a great thing in the 1970s for those of us old enough to remember,
but as time went by the better people left CB, and mostly the social
outcast where left.

  Winter doldrums got a hold of ya' again, eh? CB is still a great
thing for those of us who know how to enjoy it and ourselves instead of
looking at the glass half empty as you always do. And as usual, your
view is in the extreme radical minority echoed only by a few old angry

>battle of personal attacks and angry insults?

You may try, but odds are you won't be able to control yourself, as you are still hung up about me pointing out your playing up to obvious forges on this group, illustrating the trouble, personal attacks, and angry insults you intentionally cause. Such bizarre behavior is quite telling, especially when you intentionally and falsely accuse others of your behavior.
But sure,,,go ahead and try and explain away your actions without personal insult, attacks, or anger.

>1. Forges. I neither care nor become upset

>about forges.

Which is why you play up to them and cause trouble in this group.

>Who cares who "forges' whom?

You do, Jerry,,,you have made comments about forges in the past and you have deliberately encouraged and participated in forged threads. If you didn't care, you would never have had to reduce yourself and lower yourself to such a level, but you did.
Your actions take precedent over what your mouth espouses. You indeed care about forges or else you would never play up to them, especially when you know they are bogus. You're part of the problem on rec.radio.cb, Jerry, and everyone knows it.

>2. Whatever 'actions' I am accused of,

You weren't accused of anything..your behavior was identified, pointed out, and your trolls questioned.

>I have never had said 'actions' explained as to

>their nature.

Sure you did,,on many occasion.

>As far as *whatever* it is I was accused of

You were accused of nothing. Your behavior was pointed out and commented upon. That you take such as an accusation is proving to be quite problematic for you.
I mean, the entire group had you pegged as a troublemaker long before I came around and caught on. Hell, I defended you on many occasion but your true colors couldn't be hidden permanently. I found out the hard way you were a liar, a spammer, and a pissed off hammie who gets his jollies and rocks off screwing with others, especially those you secretly admire.

> what I AM guilty of saying what I

>believe without reservation.

Your beliefs dictate your trolling and replying to forges? Well,,,yes, that has been proven time and again. Only your beliefs are not in question and no one cares what you believe.
What actually took place by your hand was deliberate trouble causing instigated by yourself. You were fanning flames intentionally, highly indicative of your true colors that you are unable to mask through your anger.

>I posted several times that certain actions

>would take place WRT truck drivers on the

>licensed bands.

Many regular posters have warned me about you, even some well respected hammies that are present here,,,but I gave you the benefit of doubt. Even set you up like a blind carp sucking on dough ball and you ran with it. That last hotmail addy you had of mine last year was a deliberate setup to weed out the scumbags on our mailing lists. You were selected at a prearranged time to receive that email with mopar, train, nebo, and a few others who shall remain nameless in the bc line. Sure as the person who orchestrated your snare, you immediately dove in with blinders on and we began receiving spam all at the same time, on the same day. You're scum, Jerry, pure radio scum and you don't have the sense of a jack ass in heat to defend your actions.

>They are taking place on an almost daily

>basis. If THAT caused people to get mad, then
>so be it.

Fantasy land. No one is mad. No one cares except you, Jerry. You are most definitely the epitome of a legend in his own mind. All you carboard cowboys suffer the same fate,,,failure and lack of status in real life, so to compensate for your feelings of low self-worth, you take to behavior that makes you mistakenly feel, somehow, worthy.

>I stated that dealers would feel the heat for

>selling "export" radios. HAHAHAHAHA!

>Attacks, laughter, ridicule, etc ensued.

You're as sick in the mind as Dogie. You repeat yourself on cue, but never provide for your claimed fodder. Who, pray tell, has you so upset and angry that you are seeing such posts only in your mind's eye? I asked you before to post these attacks and posts that you felt was laughter directed at yourself, but you failed. You failed because they don't exist, JO, except in your weak mind. You use this as an excuse for your behavior, yet you can cite none of these posts you claim exist.

>There is now a big list of dealers that are

>under the gun. Pilot Travel Centers is the most
>recent and most expensive one.

Now it's my turn,,,LOL,,,,,,ask any trucker if Pilot is in compliance. Perhaps the single outlet the feds visited, but that's all.

>If that harelips anyone, that is fine. It is

>OTHERS that have the problem, and the foul

>mouth to go with their attitude.

No JO, the problem you have is not others, it is yourself. The only attitude is yours, here, JO. You have yourself in a huff over imagined and hallucinated posts.

>No, I am not mad and WRT to the thread

>about N8WWM,

Again, your mouth contradicts your actual actions. Stay on topic...if you can. You most definitely are mad to falsely accuse others of making posts that do not exist.

>the guilt is just that; alleged.

Same can be said about your posts illustrating warning letters sent by the FCC. Nice of you to illustrate such screaming hypocrisy. Perhaps you may even take notice some day the manner in which everyone else views you.

>There is not now,

>nor was any "guilt" assigned by the cut and

>pasted FCC article.

Same with the articles you continue to post. Ironically odd and hypocritical of you to present
articles from the exact same source when they apply to cb'ers, but discount them immediately when they apply to your buttys like N8WWM.

Concerning N8WWM, The FCC, in the exact SAME manner they announced the violation of Pilot centers, very clearly say "Enclosed are violations by N8WWM."

>He was never "charged" with anything-

Semantics,,and you suck at it.
Very rarely does the FCC "charge" anyone with anything, and if you are attempting to use an "NAL" as a synonym for being "charged" by the FCC, then anything less than such, such as a warning notice from the FCC, is meaningless, including all the posts you present here when the FCC sends such notices. On one hypocritical hand, we have you presenting and posting warning notices from the FCC sent to various trucking companies on this group, claiming those companies are in violation of FCC law and rules. But when the FCC says the same thing about your jamming butty N8WWM, you claim the guilt is "alleged" Hehehe,,,you can't have it both ways when one of your scumbag jammer friends gets caught, JO. You're a hypocrite in the first degree.

>-unless there is evidence available of which I

Over the past year, I have come to learn there exists a plethora of information of which you are not aware. Never was my initial impression of one so wrong. I will always cherish the initial misconceptions I had of you, K4KWH.

If you count the wind chill.....haha..no, seriously, we had 42 here.
It's always a few degrees warmer by the water. But the heat did get
turned on....my gosh, using the heat only once or twice a year, you
couldn't imagine the dust on the coils when the heat first gets turned
on each year (IF it gets turned on at all).

Uh, dumbass:

1) That was a cut-paste from a site that listed the history of a specific currency. Any moron (other than you) probably figured it out by about the 3rd sentence.
2) Did the article *SAY* anything about sheriff badges, moron?

I don't have to "think it's a Menorah". George Washington wanted it, and that is why he wanted it. Talk to him, loon. Grab your Ouija board, loon.

Beware, though! Small linear amplifiers are routinely used by keyclowns to increase their range when they are hunting for gay partners. A good example would be twithed, another would be mopeydopey. Both of these keyclowns will solicit you for male to male activity if they hear you on the CB.

Let me make it simpler for YOU!

You are a fucking idiot who has no sense of reality, and should never post any political stuff because you dont know anything about it except what liberal ass rimmers tell you.

Man, what a great target this crackhead is for liberal mind control experiments.

Bullshit, dumb fuck. Japan had attacked China 10 years before that. They slaughtered millions of Chinese. They also killed American servicemen when they intentionally sank US navy ships on the Yangtze river in 1937.

You should learn about a subject before you dribble your perforated septum on this NG.

As for the "sleeping giant" comment about GW Bush...you show even more stupidity, since FDR was in a wheelchair almost every waking moment since 1920 until his death.

Hello, Mopar

Well, anyone *thinking* they are anonymous should try an anonymizing web site, try to fake their address even going into that site, and try sending some info to some towel heads.

Wanna bet they'll find their butt in the slammer inside of about 24 hours? LOL ... forget about security or hidden identity. It's been gone for about 15 years LOL

They can't even fool the amateurs (not radio hams, amateur compooter folks); watch how fast the professionals can get 'em :))

Personal info? Dougs abuse of his kids is public records. The state
published that a long time time before anyone here did.

I am getting confused. You have a serious problem and it isnt just
wanting to suck black mens cocks. You have far too much time on your
hand. Perhaps a serious boyfirend may be in order. There are many
types that you like down in atlantic city!! Ever been there??? LOL!!!

Nope, thats the real Geo, his subconscious mind makes him post his gay
crap. Kinda like "The devil made me do it" excuse. I bet he deosn't
even realize he's doing it.

exactly jim. why does steve put names and addresses of ham ops wives
brothers etc on usenet? there court records etc? no one ever did that
to him. of course they can't do it to him because he hides. ask him why
he does it jim, and dont let him sidestep it

I'll answer for myself Jim, can't answer for the others.
I have posted only one persons addy, that person made the
mistake of leaving his call sign at the end of a post, plus doing
business on EBay with same email addy. Now he harasses
everyone, doesn't care at all what or who he accuses people
of, Gay sex acts, incest, forging, federal crimes, assault etc
etc. He's posted my work address, phone #, threatened to
call my work and have me fired, along with numerous others,
Jay, Tim, Steveo, Twist, Keith, Sideband, Jim H (saw he was
throwing out addys this evening) all to try to harrass people.
All in all Jim, WA3MOJ George Busch is just as
Dick McCollum said, "Just plain nuts" for harassing a person
with dyslexia for passing the Ham exam, does that sound like
the rants of someone normal?
Now watch the stuff he'll post now..... Whew, he
must be a really sad person during Christmas time, it seems
to get worse around this time from him.

On a better note, Merry Christmas and Safe & Happy New Year to you and
your family.

Very close in WA. The Ohio recount is more an issue of voting fraud.
And the "liberally-biased media" seems to be avoiding both issues like
the plague. People in both states should be outraged that the voting
process is so screwed up, regardless of who they voted for.

Of course I "practice it". Jesus represents some very fine ideals.
Just because I'm an atheist doesn't mean I have abandoned everything
good. I can still appreciate the season and the spirit -- probably
more so than most so-called "Christians" since I don't practice the
season's pagan traditions or succumb to its commercial undercurrents.

Well, I read some pretty interesting facts about the Ohio
deal. It said that some of the districts there, which were
almost all demo, voted 98, 99 one precinct voted 100%
demo. Now how the hell could you get that? A neighbor
hood with thousands of people and all those people that
voted for Kerry? not one single person for Bush? I just
find that to hard to believe.

No problem with what he said. *You* said the majority of Americans voted
for Bush. They did not. In fact, if the majority of Americans did vote,
I surmise GW would have been handed a defeat like no other.
But he won and we need move past the election. Watching him go back on

Fascinating scenario: Rossi won the first count by 44 votes; missing
ballots keep turning up and get rejected by the courts; and with 69%
of the recount finished there are more than 1000 new votes -- in a

state where most of the ballots are optically scanned and computer tabulated. At least we have a paper trail. I hear they did away with the paper trail in Florida. That's scary now that we have proof the computers are..... well, 'inaccurate'.

I won't go unless I am invited. Last thing I need a stalker lawsuit in PA.
But if he wants to meet, I am still about trying to work out a way to do
it.

I was willing to meet you if I landed the PA gig. I wasn't about to come to PA and get stood up at the airport. It's fair if you feel the same way about coming to GA. But I do travel for a living, so sooner or later I am sure a PA consulting site will come up. And when it does, I still want to meet you in person. Just be patient, you will get your chance to be a tough-guy towards me in person some day. Things always work out sooner or later.

Hello, Shark

What is friggin funny is that I've posted my call sign on this group before. Even without posting my call, a lot of folks do know I have a license. A simple look at qrz.com should reveal my real street address. One could look up by my name if they don't know the call. It will also show that I haven't been kidding about being in Rochester, N.Y.

Perhaps someone believes they can trace *everything* with an ISP address (you can, if you can twist the ISPs arm. There are a few agencies with that capability. Homeland Security comes to mind LOL)

You be sure and have a Merry Christmas and a safe and happy new year with your family too.

Also, do what I do - don't drink anymore.
(of course, I don't drink any less either ....)
(I limit myself to 1 drink per day. I am currently up to August 17, 2435)
:))

73 from Rochester, NY
Jim

It's easy to say that divorce is ugly, and that the woman is often the bad guy; because often that is true. But what kind of loser tries to hurt the ex-wife by refusing to pay for food/shelter/clothing/medicine for a child? Doug's actions are deplorable. It's just a shame they didn't give him prison time for refusing to care for his own children. Doug is proof positive that there is a difference between a true father and a sperm donor. He is the latter.

Hello, Jim

LOL - what was really funny is someone trying to post my street address and telephone number. What a riot. All they had to do was do a search on my name on qrz.com and they would have found that I really *am* in Rochester .... :))

Man, it was stinking *cold* yesterday. It was 3 below during the night and zero at the 11:00 AM news! No problem with the locks on the car doors, however. When it gets that cold, you never know - regardless how new or old the vehicle is.

73 from Rochester, NY
Jim

He's white trash. I wouldn't live in his neighborhood for free, I shit
you negative. What's also ironic about his mess is he was playing around
with, and selling radios and antennas when he got the felony bust.

What kind of scum is out buying radio gear while his kids go hungry?

I'm posting this in hopes that someone else will not make the same mistake as the real life CB idiot in this true tale.

A ham friend lost his job and needed some money. He had a beautiful Henry 2K Console amplifier with two 3-500z tubes. He sold it to a local CB'er for the unbelievable price of $500!!!!!! The CB'er using the typical CB mentality decided to take a small CB amp, drive another CB amp with a single 3-500z tube, and then use that amp to drive the two 3-500z tubes in the Henry 2K Console, because he thought it would put out 5000 watts. Well about all the Henry put out was a puff of smoke.
For future reference the recommended drive power for a single 3-500z is 46 watts and twice that for two 3-500z tubes. That is not 46 watts carrier and 100 watts swing. That is 46 watts max including forward swing. At 2500 plate volts in grounded grid class B operation you should get about 600 watts per tube. Below are the specs for a 3-500z tube. Yes you can over drive them to get more, but the more you over drive them the sooner it will be until the tubes or the amplifier goes bye bye. Please don't be an idiot and send another nice amplifier to the CB graveyard by overdriving it.

Apparently, that kind of scum. What blows me away is that this loser couldn't even drop off a box of generic macaroni and cheese to his kid's wife, just to keep the little lyke from starving? And pissing war aside; why does GEO defend a person that would let a 4 year old child starve to death? You showed great restraint by only taking a picture of the scumbag and teasing him a bit. Someone with a shorter temper would have done a lot more.

I only went there to see if he had the nerve to say that vile shit to
my face, instead of hiding behind a monitor and typing it. I hardly
got that pic..he was ducking behind the door after he seen me take
the first one. Everytime I put the camera up to my eye, he would duck.

He's back to his sick vile shit again because he is a mental case, and
he figures I'll never see him again. He -will- have to say that vile spew
to my face someday.

I've seen him in person...he ain't up to the task.

steve did give me his name, address & ph # for that matter. it seems the
trust thing is among those who respect privacy. you wont get anything
because of the animosity you created. jim h says happy holidays and look

had rain then sleet before changing to snow which stopped at about 5".
the magnetic gate at work was frozen and the manual gate was all iced
up. lucky to have de-icer in the truck to get past the manual one but
had to go and get hot water to pour on the mag gate. that froze over 5
minutes after it was poured but at least we got in. now 55 forecast for
thursday, go figure...

you do the homework george. if you were so interested in getting his

addy then put some effort into getting it other than pleading on this forum. even if you get it then you might be nailed for stalking.
and whats this crap about shaming me? i wont bring the particulars up but you should talk...

What part of Jim has my name, address, and phone# is cornfusing
to you? And so do other regular posters to this board. The difference is
we don't act like total fools. (well not on purpose)

I've made several good friends from this very board, geo. We email
each other with a plethora of things, but rarely anything about
this board.

I know it would be a new concept for you and dogie, but try this:

Be sociable to people, and don't act like a punk. (no flame)

Now call me gay and roll around on the floor.

why? again its in the public domain. if one was smart then one wouldn't
have their particulars posted where someone could find it. no offense
but some discretion would have helped your story. later bud...

I got up this morning and had asscoffee, then I read the asspaper. After that I turned on my assputer to read the assgroup. Then I made homosexual related assposts. Then I went to the livingassroom and spun in asscircles at the imaginary assdemons that were chasing my ass. Then I opened my assdoor to make sure Steveo wasn't on my assporch. By that time it was close to asslunch, so I had an assandwich, with some asstomato and asslettuce, garnished with a few assprouts. Then, it was back to the assgroup to spew more assisms. After all that work I was asstired, so I took an assnap and waited with baited assbreath for those who work to post to the assgroup. Sure enough, there they were, the assclowns with jobs! God, I can hardly contain my asscitement waiting for them each assday! They are my asslife!

Blah blah blah. Any time you want to move the schedule up by coming to Georgia, I will meet you right at the airport. And I am so sure that you are a chickenshit; I still offer to pay you for your trouble if you can grow some balls to come to GA. Otherwise, coward; you will have to wait until my coming to PA to bitch slap you fits into my schedule. Additionally, you never gave me an address or phone number; so once I got to PA, what did you expect me to do - stand at the airport with a "looking for George" sign? Coward......

sure is "half of Americans wanted to get rid of George W. Bush."
how does he know this? where is the poll, there is 290 mill people in this
country according to the 2003 census bureau out of that 217 mill are over
the voting age or over, almost 118 million voted more than 1/2 voted for
Bush that is a known fact, that you cannot dispute, less than 1/2 voted
against him, what ever numbers you come up with arte pure speculation based
on no factual evidance.

Annual Estimates of the Resident Population by Selected Age Groups for the
United States and States: July 1, 2003

18 years and over Americans - 217,766,271

Votes for 2004 presedetial election
George Bush 60,608,582 John Kerry 57,288,974

60,608,582 GWB
+
57,288,974 JK
= 117,897,556/217,766,271
= 54% of Americans able to vote, Voted in 2004

Yes, the majority of americans who voted, clearly voted for Bush

have you been reading this NG??thats what your hero steveie wants
people to do, to meet him at the OH airport.

hard to believe he is so terrified of a couple of hams knowing his name
and address.....LOL 100x

LOL!!! Republican computer repair procedure:

1. Remove hard drive holding valid ballot data;
2. Replace with hard drive holding manufactured ballot data;
3. Demonstrate procedure to computer-illiterate investigators;
4. Go home and cash check.

Boy, that sounds like an internet threat. Don't let your keyboard
write a check that your ass can't cash.

I am not Steve, freak.

I highly doubt you will do anything of the sort. But that is between you and him. I'm more interested in talking about you and I. I want you to come to my door and say you are going to pound me senseless. Oh God, give me a reason to take out my anger on you, George. Please, come to my house and tell me you want to pound my ass.

I do not have the right, nor the inkling to give you Steve's address. In fact, even if Steve asked me to, I wouldn't. If you want his address, get it from him. But if you want to see me, then I am the man to talk to.

> otherwise STFU with your

Make me STFU, George. Oh please - I am begging you - come to Atlanta and make me STFU. Or send me an e-mail privately with how I can come see you; and we will work something out.

I do not like that George; not one, tiny bit. I wish he hated me nearly as much as he hates you. He won't come see me. Iv'e asked, and even sweetened the pot with cash. He isn't interested.

Take him up on his offer. Hell, if you don't want him fucking with your real possessions; just rent an apartment for a month and give him that address. Sit there in a lawn chair and wait for him. Bring your sleeping bag to snooze in, and order chinese food and pizza delivered every night until he shows. When he shows, do what you feel you are justified in doing. Fuck, I wish George would come visit me. To make it fair, I wish he would bring Frank and Doug so it would be a little more fair at 3 on 1. I would feel less guilty about what I want to do to them if there was 3 or 4 of them at once.

Nah, he ain't worth all that. He's a scrawny punk in a basement that
took his first communion money and bought a 32 pill dave made or
no name, or some such. I enjoy poking him obviously, but I know he'd
never muster the courage to come down my driveway.

It's a moot point..now if you find yourself in a situation where
you would run into him, sorta happenstance like, well then you
can please deal with him accordingly.

Donut go out of your way tho..it's a waste of time as far as I've seen.

Tryin' man. So far so good but that's usually when stuff starts
stressing out and breaking. It's really tough on the gear and we
try to fix as much as we can ourselves but even then, the parts
are fairly expensive for anything snow..I'll cross my fingers
but I have a feeling I just hexed myself.

Glad they don't use all that salt on the roads down here. Supposed to
be a chance of snow tonight. Would be nice to have snow for
Christmas, doubt if it will happen..

Just what the hell is "trolling" anyways? Is it a good thing? It must be cause everyone wants to be one or r 1 (hee hee hee hee). No but seriously trolling must be one of the most popular things to be on the net (next to professional wrestling, oops sorry, Sports Entertainment) Perhaps I should change my handle to The Legendary Freebanding Rubber Troll hee hee hee hee hee. Even oldtime hams want to be trolls I hear. Yep, trolling IS fun and everybody should be one (hey that rhymes, cool) Catch you all on the flipflop mercy sakes alive this here's the rubber duck we gone bye bye 10-4?

Man we go thru big dump truck loads of salt. Nasty rust your tools stuff
that comes from underneath Lake Erie. That's what rips up the gear
so fast. It's hard to keep brake and tranny lines on trucks that drive
thru that salt soup we lay down. It rots almost anything that isn't
stainless or plastic. It's also the most profitable part of commercial
snow so ya take the bad with the good. ;)

You aren't a stranger to me, we're buds, remember? Anyway, I AM good in the
book. Whatsamatter? Scared, little boi?

A job? Oh puhleeze! You can't hold your breath, much less a paying
profession! Go lie to someone else.

Just an observation, nothing more, or less. Deal with it. I have no sock puppets, unlike you.

Your head is nothing but "random letter and numbers". Of course, from time
to time, you do manage to connect a string of 2 or so words into a coherent
sentence, but those occurrences are rare.

Atlanta is the nearest airport. Hey, freakshow - let's leave it at this - you send me an e-mail with your true name/address; and I will not post it or give it to anyone. I will respond in kind with my name/address; and I will burn some frequent flyer miles and come see you the first week in January; before I start my next client site. Does that work for you, George? You don't want your name/address in this group; and I feel about the same. Let's not let that one issue stop both of us from meeting.

I'll put my lightweight, 16 year old son, up against him in boxing gloves
any day. Geo's a sissy-boi, and is too scared to go against anyone, well,
maybe he'd go against a really young little girl, but that's about it.

Yes that is a very good cb radio. It has an excellent and very annoying roger beep and a good echo board too. Just the thing to use on the band to talk to the truckers on CH 19 (28.085)

Top of the evening to you Lad! Thanks for the
wishes, may the same happen right back at you.
I will probably go Mackinaw Trout fishing sometime
next month, otherwise no fishing until spring when trout
season opens.
Don't let Geo ruin it for you, he just gets this way
around the holidays for some reason.

Merry Christmas to you.....

Tease and make gay jokes all you want, George. You will never be a real man until you can stand up to your enemies. If you are afraid to meet me (and I don't blame you for that), at least be man enough to face Steve.

Why does it have to be his driveway, George? Why not a YMCA if you like boxing, or a Dojong if you prefer martial arts? Just meet him at a public place that allows sparring.

He wont bite he is a coward that calls people names because he thinks
he is basically safe on usenet. But someone can find out his info
especially since he bought his 32 pill from concrete man. I know some
on here know how to contact concrete and well maybe his info will be
known very soon. Happy New Year to prozac, It might be his last.
I know he is mad at me now!!! Watch the retaliation!!!!

And why does this kid do that? I mean he is too scared to meet in
person everything is this usenet. He puts someone's address on usenet
why? Who in their right mind would give him their address? So he can
put it on every usenet group? He is such a child. I mean he is funny
at times but the kind of shit he does would get him a smack in the
mouth at the very least out of usenet! It just makes no sense!

His name used to be prozac from the bayshore network. He is in NJ and
he befriended concrete man from davemade to buy a 32 pill amp. Now he
is just sad and lonely no girlfriend or job and mad at everyone. Hence
the racial and homo remarks he has made on usenet!

You presented the evidence quite nicely. The majority of the US
population did not vote for Bush.
You said the majority of Americans voted for Bush. They did not. In
fact, if the majority of Americans did vote, Bush would have been handed
a defeat like no other.

>Yes, the majority of americans who voted,

The soldiers are still dying each day
because of one sticking point,,,,,,,Bush has yet to provide adequate armored vehicles like he has promised ad promised and promised since his campaign.

>do you want him to shit them out?

How he gets them there is his problem, but he better do something. The death rate of Americans is becoming unsettling to the point where staunch republicans are beginning to slam Bush for his incompetence.

_
To date, not a single additional armored vehicle has been manufactured and ordered to be sent to the mideast.

Oh yea,,Philthydelphia..the paper tiger of this year's weak NFC who played mostly a weak schedule....lemme see,,,New England, Philthy, and Pittsburgh all have one loss each. Pittsburgh handed NE AND Philthy their only losses. Philthy gonna let it slip away again this year. Duce Staley and the boys gonna remind the Iggles they are a second rate team from a filthy, corrupt, crime laden city and have no business trying to run with the big dogs. Like you, they are a loud mouthed bunch with not much else.

Nah! you don't need that. A good 20.000 Watt amp would do. LOL

I've seen a $20.00 amp. It's smaller than a pack of smokes and puts out
25 watts (I think).

Anonymity is no big deal. If you want to fight Steve badly enough, you
will just meet him somewhere anonymously and get it over with. I am sure he
would agree to that. Hell, I would.

IS there on of these?

I want to replace my FM Antenna with a CB Antenna..

I do not like the looks of 2 antenna's yet I do not want one of those stupid boxes that convert a FM antenna for CB use.. I do not beleive those converters are a great idea.

Nothing but what a weird freak does in total frustration that she cannot make the AKC stop. This painful, keening frustration makes him drive hundreds of miles and take pictures of people's houses.

Mopeydopey's psychotic mind thinks that he can do something to stop the AKC, but he cannot. AKC has proven that all mopeyfairy does is rant and whine, just like he did as a little child when he was at WalMart with mommy and wanted toys and candy.

Why would AKC take a ham traitor like you seriously anyway?

Kinda like your fellow gayboy mopeydopey's behavior, ay? Of course
there is an exception to his behavior vs. mopey's...mopey dopey hangs
out in truckstop toilets on his knees, AKC'ers are hetero so they dont.

The antenna seems to be alittle short for pure CB purposes. I get a
1.1:1 match at 27.750, and a 1.5:1 match at 26.965. No matter how
much I turn the rings, the SWR changes only a little.
Has anyone experimented with putting a different top whip on this
antenna? A 102" whip would add 8" of length, thus bringing my SWR
curve down to 1:1 on channel 1. In theory, it should work.

You'll have to get his address from him. I refuse. You better hope he is
not a martial artist. He might do something funny like shoving the
blackjack up your unconsious rectum and photograph it for webshots.

We've never gone 7 years here before without a hard freeze. Maybe 2 years,
but that's about it. People have planted all kinds of odd tropical plants
usually grown outdoors only in FL or CA. We have Norfolk Island pines here
now that are 40' tall. All in all, it ain't gonna be good as these people
will now have dead stumps to deal with. We used to have extended freezing
weather here, where even the saltwater bay would freeze in the shallows a
few inches thick. Haven't seen that since the '80s. I'm a firm believer in
global warming, but Bush says we need it so that he can relax EPA
guidelines.

Well, this is one reason that some folks have given as to not wanting an amateur radio license. That information is public record and is posted on qrz.com. Of course, if one isn't involved in something illegal or immoral, it really doesn't make a whole lot of difference. Heck, if you want to pay a few bucks, you can get all kinds of information on neighbors, etc.

I see (on the 11:00 news a few minutes ago) that they seized someone's computer and found thousands of still porno pics of kids and a number of videos too ... Perhaps the lack of privacy is not totally without its' redeeming features ;)

I find this service that I'm using for the newsgroups is just fine for what I want. No binaries. Binaries, of course, may well include software (legal or otherwise) and pictures (ditto). Plain text serves me just perfectly ;)

Best regards from Rochester, NY
Jim

Of course! With him in charge, maybe your winters will only get down to
about 50 degrees. But then, soon after that the CO2 will make it sure that
you don't reach 40 degrees in the summer.

Yes.

Just be sure you set the xfmr taps
to 120, plug it into 220, then hold your
face 4" above the top perforated metal
cover before throwing the ON switch.... ;)

Yes they have them.. Not really what I want... I want a real CB antenna
so I am not taking a huge power loss

Basically I would like to mount per a say real cb antenna (FireStick)
in the hole for the AM/FM antenna on my Pontiac..

Thanks,

You have to understand the motivation behind mopey's visits. Keyclowns are desperate people...they do not have the mental faculties to tolerate being bugged about their keyclownism. It makes them upset because they have to hear dissent. Steveo is the poster child for this attitude. He simply cannot take it when somebody gives him crap about being a keyclown.

This atttude has no doubt been developed by a lifetime of crying and whining to get his way. It started in his childhood, when he whined and cried in supermarkets and malls to get candy or toys. When his parents indulged him in these situations it reinforced the idea in his young mind that if he yelled and cried to get his way that he should always get it.

As he became a young adult and found that life had to be met on life's terms, not his, he railed at the injustice of it all. Teen years immediately before this stage found him in a constant state of barely controlled rage and often acting out in his frustration. Typical of such incidents are punching people who cut him off in traffic, yelling obscenities out car windows, and showing no consideration for others.

Such is the mentality of a keyclown. RF spectrum, to a keyclown, is nothing more than a wide open space to play in. If this were a private yard or a public place belonging to all taxpayers, the evidence of keyclownism would be obvious. The place would be uncaringly trashed with garbage and the observed attitude would be "So what if it is a mess, you wanna MAKE me clean up after myself, sucker?"

The visits to peoples' homes are an expression of this frustrated, thwarted, angry personality. Mopey tries to make someone conform to his ideas of what should be in the NG by making threats and visits. To mopey, the worst thing on earth would be if the AKC knows his address, and his logic is that him knowing AKC addresses should strike fear in their hearts. You see, when he visits with his 12 gauge digicam the AKC should shake. They do...with laughter.

The fact that mopeydopey shows himself to be a disturbed individual in these visits does not dawn on him. This is because he is not inhabited with the normal sense of right and wrong. His opinion, like that of all keyclowns, is that whatever he wants to do is OK, and if someone disagrees then he has the right to attack them, physically or otherwise. This affliction is commonly called a sociopathic disorder.

The very fact of posting this message will bring a barrage of name calling, threats, and other things that keyclowns believe are

effective. They think they are effective because they are effective at riling THEM up. This attitude is consistant with keyclownism's main root causes: the fact that keyclowns are only aware of what they want and have no concern for others, coupled with a total inability to tolerate even the most basic forms of disagreement.

The reactions to this post will prove the thesis as presented. Keyclowns are simple creatures, and always behave in a predictable manner.

That fine young man reminds me of me when I was a youngin and had hair. Nice
kid, if you like kids. I hate kids, I refuse to even feed my offspring...I
don't care how many felonies they give me!!

That's all? I'm heading to Lake Tahoe, wife & kids and I
are spending up there with my family. They are expecting
Saturday night into Sunday 3 to 6 feet of snow during that
period.

Some of them are living an illusion
Bounded by the darkness of their minds,
In their eyes it's nation against nation,
With racial pride, sad hearts they hide,
Thinking only of themselves,
They shun the light,
They think they're right
Living in the empty shells.

Hell Jim, It doesn't make a difference at all even to those of us who do dx on 11 meter. Of course, all people do not share our feeling on this matter.
Hammies and cbers alike have had occurrences outside this ng or have been hassled in some manner by Adair and a few other rabid losers because of something they say on usenet. In some cases, the repercussions can be severe, such as Dennis had in that bullshit when Hall and Lelnad and Dogie all conspired to contact his employer.
Dogie and crew epitomize the internet kook representation with their 5 year failure-record obsessing on internet stranger's personal lives.

>Heck, if you want to pay a few bucks, you can

>get all kinds of information on neighbors, etc.

Yea...such an act would leave a superb paper trail for the courts. Electronic harassment must be documented, identified, repeated, and proof the offender was/is aware such activity is of a harassing/illegal nature, and a repeat offense. To date, three of our most infamous posters meet these credentials.

>I see (on the 11:00 news a few minutes ago)

Yea,,,they did the same thing with Pete Townshend from The Who. He said he had all that garbage in his computer because he was researching pedophilia, but he was the only person aware of this "research".

My sentiments exactly, yet some have difficulty accepting other's choice of usenet access. Years ago they had a special where you signed up for online surveys and after participating in so many, a free web-tv was received. There were several ways in which to get free service also, but those ways have been done away with. Fortunately, some of the old time die hards that held on to their units and stayed in the club, continue to reap the bennies of free service.

And why does this kid do that? I mean he is too scared to meet in person
everything is this usenet. He puts someone's address on usenet why? Who
in their right mind would give him their address? So he can put it on
every usenet group? He is such a child. I mean he is funny at times but
the kind of shit he does would get him a smack in the mouth at the very
least out of usenet! It just makes no sense!

Well, this is one reason that some folks have given as to not wanting an

amateur radio license. That information is public record and is posted on qrz.com. Of course, if one isn't involved in something illegal or immoral, it really doesn't make a whole lot of difference. Heck, if you want to pay a few bucks, you can get all kinds of information on neighbors, etc.
I see (on the 11:00 news a few minutes ago) that they seized someone's computer and found thousands of still porno pics of kids and a number of videos too ... Perhaps the lack of privacy is not totally without its' redeeming features ;)
I find this service that I'm using for the newsgroups is just fine for what I want. No binaries. Binaries, of course, may well include software (legal or otherwise) and pictures (ditto). Plain text serves me just perfectly ;)

Jim

>Jim, no disrespect meant

But of course, you posted his personal information where people actively download new information on a daily basis as a sign of respect.

>as you said it is on

And after you prove it to yourself, you can take issue with yourself, then decide whether or not to agree with yourself. All out of respect, of course.

lemme see,,,New England, Philthy, and
Pittsburgh all have one loss each.

Pittsburgh handed NE AND Philthy their only losses.

Philthy gonna let it slip away again this year.

Same place. Pittsburgh has a ton of injuries, so the games they are
winning are even more special and amazing.

_
Staley and the boys gonna remind the Iggles they are a second rate team

>2nd rate?

Perhaps third.

> Pittsburgh is second rate, it is the armpit of

Actually, by comparison, Pittsburgh is the crown jewel compared to
Philthy.

>The steelers are having a good year thanks to

Staley doesn't have near the yards Bettis has and has been out the
majority of the season.

>the eagleas are hardly a 2nd rate team.

Perhaps third..

>Thiey are a model team for every NFL

>franchise

No team that has never won a SB and who has always choked (raed: lost)
in crucial games are a "model" in the NFL, nor does any other team
strive for such low performance and non wins.

> from administration to facilitys to coach to

>players. dont be to jealous, your team sucks

>again.

My team? I told your lice ridden cur self long agao, my favorite team is
whoever stomps a mudhole in Philthy's azz, and for the last few years,
that has been many teams, in many sports.
The Iggles are in a filthy, corrupt, crime laden city and
have no business trying to run with the big dogs. Like you, they are a
loud mouthed bunch with not much else.

>You couldn't live in philly i guarantee that you

>wouldnt last very long ,

You are exactly right. I have way too much pride in my surroundings. I
have been all over that filthy disgusting city..from Kensington, to
Germantown to S Philly, and it's the same everywhere,,,,ignorant people,
mean people, rude people, crime, filth, litter, dirt, grunge, scum,
gangs, lousy and unsafe schools, homelessness rate off the richter, and
wannabe wiseguys, whiggers, and wannabe gangsters.
In fact, Philthy rates in the top three for welfare cities in the
country. That's despicable considering New York and LA are factored in.
You can bathe in a cesspoole and call it the Roman Bath, but others can
still smell the fecal matter you refer as soap.

> jr loud mouth bunch with 9 players in the Pro

>Bowl .

Big deal,,,Pittsburgh has 6 and have been winning with all those injuries. Philthy is playing their best players and still struggling to win.
Besides, the NFC is notoriously weak this year and the Iggle's had one of the softest schedules in the NFL...Pittsburgh, had just about the hardest.

>.. Boooo yaaaaa

Nothing like Philthy fans getting all cocky right before being disappointed,,,,,,,,again,,,by their losing sports teams. It makes it all so much sweeter.

Both my hr2510 & Magnum recommend 1.5 or less, plus I bought a big
fat linear amplifier. my super bigstick adjusted down to 1:1, and I
made a homebrew 11m yagi that I got a 1:1 match. We used to put PAL
Firesticks on top of Big Sticks to get better bandwidth. Cause once I
go below channel 1, the match goes close to 2:1.

Lance, 8 inches more not 8 feet, hehehe.

I can't wait to key down my big fat 600 watt amplifier, that I bought
off of ebay. I am going to crank up my modulation so that I splash
all over the place. Once I get it were I like it, I am going to step
on all those gay ham radio op's on the ten meter band. God, life is
good.

Bullshit, George. You have made repeated comments against Jews and Blacks. Nobody put a gun to your head to make you do that, racist. Homo - well you act gay; but it's Usenet so who cares what you do in your spare time. The racism thing - you need to fix that flaw in your personality as soon as possible. Someday you will run into the wrong person in real life and wish you kept your racist opinions to yourself.

You have to understand the motivation behind mopey's visits. Keyclowns are desperate people...they do not have the mental faculties to tolerate being bugged about their keyclownism. It makes them upset because they have to hear dissent. Steveo is the poster child for this attitude. He simply cannot take it when somebody gives him crap about being a keyclown.

This atttude has no doubt been developed by a lifetime of crying and whining to get his way. It started in his childhood, when he whined and cried in supermarkets and malls to get candy or toys. When his parents indulged him in these situations it reinforced the idea in his young mind that if he yelled and cried to get his way that he should always get it.

As he became a young adult and found that life had to be met on life's terms, not his, he railed at the injustice of it all. Teen years immediately before this stage found him in a constant state of barely controlled rage and often acting out in his frustration. Typical of such incidents are punching people who cut him off in traffic, yelling obscenities out car windows, and showing no consideration for others.

Such is the mentality of a keyclown. RF spectrum, to a keyclown, is nothing more than a wide open space to play in. If this were a private yard or a public place belonging to all taxpayers, the evidence of keyclownism would be obvious. The place would be uncaringly trashed with garbage and the observed attitude would be "So what if it is a mess, you wanna MAKE me clean up after myself, sucker?"

The visits to peoples' homes are an expression of this frustrated, thwarted, angry personality. Mopey tries to make someone conform to his ideas of what should be in the NG by making threats and visits. To mopey, the worst thing on earth would be if the AKC knows his address, and his logic is that him knowing AKC addresses should strike fear in their hearts. You see, when he visits with his 12 gauge digicam the AKC should shake. They do...with laughter.

The fact that mopeydopey shows himself to be a disturbed individual in these visits does not dawn on him. This is because he is not inhabited with the normal sense of right and wrong. His opinion, like that of all keyclowns, is that whatever he wants to do is OK, and if someone disagrees then he has the right to attack them, physically or otherwise. This affliction is commonly called a sociopathic disorder.

The very fact of posting this message will bring a barrage of name calling, threats, and other things that keyclowns believe are effective. They think they are effective because they are effective at

riling THEM up. This attitude is consistant with keyclownism's main root causes: the fact that keyclowns are only aware of what they want and have no concern for others, coupled with a total inability to tolerate even the most basic forms of disagreement.

The reactions to this post will prove the thesis as presented. Keyclowns are simple creatures, and always behave in a predictable manner.

Thanks, Lancer. It looks like the snow has let up now and it's just a deep
freeze. It's a whopping 8 degrees here this morning.

Must suck to spend Christmas alone.

I bought my G-son a Heath GR-64 shortwave receiver off E-bay, So
I get to align it and clean it up a bit before I wrap it today.
Hopefully it will get him interested in radio.

Hopefully he will get into it. I need someone to give all my radios to when
I retire and buy a motorhome. No way are my radios going to an estate sale
and then being sold on E-bay for a big profit.

>The eagles have by far more injuries and to

>more key players/starters, all season long.

They have more injuries because they are getting the hell kicked out of
them when they play a solid team. Nevertheless, the Steelers have had
more of their top producers (compare the player stats against the
Philthy player stats) out than Philthy, especially in key games.

> 7 players lost for the season, Pitt has 3, So

>another lie put forth by you.

Mere incompetence from you. Only you and your communication deficit is
speaking of injuries out for the season. As of last week after
Saturday's game, Philthy had less key injuries than Pittsburgh.

>Also pitt is playing with thier best players they

>need to clinch home field advantage

>you dumb fuck.

The dumb "fuck" has always been you not being clued in. I love educating
you,,,,tell us about your intellect regarding what you don;t
know,..lmao. There are a host of 1st string players they have done
without in key games.
Your polls and rankings you present are a joke....they just make for
good entertainment value, regardless of where the teams are ranked. One
poll (Fox) actually dropped Miami down a notch after winning over
NE...talk about hilarious...they use the same non-logic you that always
has others smacking you around at leisure and dragging your hairlip
around the net.

That the Dolphins dropped rank after beating the "#1 team" on National TV and the Giants moved up one past the Dolphins after losing to the "#2 team" is the logic one would expect an ignorant Philthy fan to adhere. Gotta love those armchair 'experts'....just like yourself. LMAO!

_
Besides, the NFC is notoriously weak this year and the Iggle's had one of the softest schedules in the NFL...Pittsburgh, had just about the hardest.

>Why do you lie like you do?

Ignorance is what keeps you on the chain.

> You are either clueless or you are just a

>jerkoff,

Perhaps, but you are an uneducated and can not be taught. Your communication deficit prevents it. You are like a small child. You realize your limitations (communications), so you gravitate toward what you naturally are denied.

> I think you are just a jerkoff who likes to lie.

And one may not find fault with such logic held by special folks with double digit IQs, such as yourself.

> the steelers have the 24th easiest schedule,

>the eagles the 28th going on last season

>records of teams to play, why are they so

>close?

Last season is meaningless. For years everyone has tried to pull you out of the past by your hairlip, but you cry and long for history,,just like the days of old you pine away for..lmao! You're washed up and no one sympathizes with your mildly retarded self living in a conjured dreamscape.

>Because they both play many of the same

>teams as well as each other.

Philthy's schedule.......Pittsburgh Schedule

Giants Oak
Minn Balt
Detroit Mia
Chicago Cinc
Bye Cleve
Carolina Dallas
Cleve Bye
Balt NE

Pitt Philly
Dallas Cleve
Wash Cinc
Giants Wash
Gr Bay Jax
Wash Jets
Dallas Giants
St Lou Balt
Cinc Buff

If you are unable to tally the results and stats for each team to decipher which schedule was harder this year, I will have another explain it to you, since your anger problem and low self-esteem prevents you from communication proper when attempting to communicate with myself. In addition, you can always watch Inside the NFL, consult the polls you selectively cite, or join any of the chats concerning such. In fact, we can cruise on over to the Steeler discussion and you can have your clock cleaned by the enlightened and superior intellects (compared to Philthy mouths like your own whose vernacular is so limited you must use colorful profanity in order to attempt to make your hurt feelings known). Actually, it's more fun to shove that crow down your snout year after consecutive year after Philthy does what they do best,,,choke and blow it.

What I find funny, is Lelnad's and Hall's illegal cb use is becoming general knowledge. I have a new radio friend in Chi town.....:)

Twas the night before Christmas and all through the group
Geogre was angry, as was Jerry the kook

Patrolling the air, trolling the net
looking for cbers, in trouble they get

"Wasn't me" yelled Lelnad.
"I was framed" sounded Hall.
"Prove it" sobbed Dogie, as he played with his ball.

"I'll find that trucker who breaks the law"
Jerry the kook said
as he forged another call.

Dogie said "I'll threaten Mopar and
see if that matters"
And soon found out, his brains damn near got splattered.

"But they're illegal" added Geogre
as he keyed his mic
As the world laughs behind his back
night after night

Get Twisted, get Mopar, get Shark and NY ICE
we've tried for years
and each day fail twice

We can holler and scream and ruin our rep
all over cb
and those who we know nothing of yet

It's Christmas Eve night, the cb full of chatter
To the above named litter
rec.radio.cb .....is all that can matter.

Merry Christmas to all and to all a good night!

George, don't you have anything better to do on X-mas eve?!?!?! No parents, no wife, no kids, no friends? There has to be someone you can hang out with and drink spiked egg nog with, no? If not, that's really sad. Can't you at least be nice to a few folks and hopefully make one friend to hang out with on Christmas eve? God, I feel horrible for you and your pathetic lifestyle.

Must be one of those nasty liberals LOL.

Isn't it interesting to wish happy holidays in the United States?
Confusing, huh?

Just wish the rich even more and you'll not get in any trouble LOL

Mopar,

Opportunity knocks! Remember the badges for the hams? Why don't you make some badges for NetKops and sell 'em? Might be interesting.

Hello, Mopar

I believed I mentioned before that qrz.com shows all. One can search by
call, name, or address. Perhaps a few folks will figure this out and ....
well ... let's just say go qrt.(as in STFU LOL) :))

I blame it on the kids. The use the last of stuff, and don't tell a soul. Then when you are looking for something, it's not there. As it turns out, Sam's Club was dead. We were in and out quicker than any other time I can remember. But we were out of too many staples to wait any longer (milk, eggs, sugar, juices, etc.). Tomorrow we will do a big X-mas dinner, for about 15 or so. Non-Jewish stuff like spiral ham, etc.

Hello Jon:

Yeah probably a good call there. Well Santa was able to find my house alright. I got just what I needed, yeah haw! And Santa did drink down that VO and Seven drink I put out for him, and the sandwitch is also vanished.

Well time for Brakfeast, OH YEAH!

Merry Christmas, Happy New yew Year and God Bless you and your family.

Man, this store ain't shit. If your looking for a GOOD Gay store, you need to look at http://Gay.BBSSM.com or if regular, then look at http://www.BBSSM.com, or if lesbian, at http://Lesbian.BBSSM.com

same store, just different fronts to cater directly to different people.

Count me in, we really need more band space. I feel very cramped on
11 meters. My new radio I bought on ebay will cover 12 m also, but
the only people there are gay ham op's. We need to liven things up a
bit, it's time the little people stand up and be counted.

My beautiful RMitaly KL500 that I bought is itching to cause some QRM.
So you have a grip on my lip?

I am a newbie to ebay, I do get all my radios off there. As a matter of fact, I didn't realize they had amps until AKC whined about it on here. I promptly bought one. You gotta love it, when I started freebanding 20 years ago, all I had was cobbled together equipment, now it is a top notch radios, and really nice amps. Life is grand.

Assuming no windings are shorted, you might turn about $10-20 profit
if you blow them out and replace the brushes, bearings and regulators.
If not, scrap copper goes for around $.90/lb.

Hello Programo5:

At 15 dollars each, and used sounds like there are not in premium shape.

It may be possible to have them rewound for a higher current, for running a 4 or 8 pill amps. My 4 pill 2SC2789 amp will draw 75 to 80 amps with no problem.

A 105 amp alternator may have a higher peak current capability than just 105 amps. I have never measured it but I would think it would have say a 10 to 20 percent higher peak intermittent rating. Anybody know about this or measured it?

Most Installations I have seen with a 8 pill amp have had only a 100 amp or so Alternator. So when the 8 pill amp wants to draw say double of what a 4 pill amp will draw something like 150 to 160 amps or more, the Alternator will put out its maximum output current, but the voltage will drop, and the battery will start to put out current. And when the amp is unkeyed the Alternator will try to recharge the battery, at a rapid rate. Its possible to get behind the curve of the Alternator charging the Battery, and the battery can over heat and possible be damaged with high current charging over a long period of time.

A lot of guys use large batteries. I think the large batteries is a bad call as the Alternator should be able to source all the current, to keep the voltage as close 14 volts under load to keep the out put power up there. And if a second Alternator is installed it can be wired to also charge the vehicles battery or run the electrical system should the stock Alternator fail.

When the guys volt the amps, running more than 14 volts to increase the out put power even more, then you must have one or more Alternators that will have the current capability to maintain the higher voltage. The Alternators outputs can be connected together as they are diode isolated internally, so feedback from one alternator into another alternator will NOT happen.

One of the really neat installations I saw at one of the shoot-outs, was a Bird Watt meter modified to also be able to indicate the amplifier input voltage and current. And many guys have a separate volt and amp meter on the dash to indicate the voltages and currents, pretty neat-o.

The current rating is for a specific RPM which is typically high. The
current drops off to a bare minimum at idle which is why you sometimes
see the idiot light come on while waiting at a stop light.

Starting-type (auto) batteries are designed for fast charging.
However, a deep-cycle battery would be ruined by such cycling.

>A lot of guys use large batteries. I think the large batteries is a bad

Lead-acid batteries under charge (engine running) have a thing called
"surface charge" that's higher than the nominal 12.6 battery voltage.
Larger batteries have a larger surface charge, and when under load
they tend to keep up the system voltage better than smaller batteries.

> And if a second Alternator is installed it can be wired to also
>charge the vehicles battery or run the electrical system should the
>stock Alternator fail.

You might have a problem with the regulators. If more than one alternator is used it's best to run the second from a 'slave' regulator that's controlled by a 'master' on the first alternator. If you don't then one alternator will pull the full load until the voltage drops down to the regulated voltage of the second. The result is "stepped" regulation and can be quite noisy.

>When the guys volt the amps, running more than 14 volts to increase the

Max current is dictated only by the wire size. Without the regulator, voltage is limited by the PIV of the rectifiers and the insulation breakdown voltage. The latter is usually very high (~600 volts) so if the rectifiers have a reasonably high voltage rating then you can trash the internal regulator and use an external regulator to get voltages up to 100 volts or more, depending on how fast you can spin the rotor. But if all you want is max current at 16 to 18 volts then a smaller pulley would probably do the trick.

.....uh, voltmeters and ammeters in the dash aren't exactly new ideas. Neither are voltmeters and ammeters at the input to the amp -- that's how input power is measured. The old "5-watt" CB radios were rated by their input power, and years ago the ham radio limits were also by input power. Nothing new here except the modification of a Bird to do the job of a cheap multimeter.

105 amps would be big for a Dodge Dart, not a Peterbuilt.

While typing out my response to Jay I thought of something you might
want to try: swap out the regulators so they can be used in 28 volt
systems. Twice the power. And there are plenty of 28 volt RF power
transistors available if that's your cup of tea.

I have a chance to pick up like 8 used 105 amp Leece Nevilles for $15 a
piece..Is this to low of an output to make it worth grabbing them and
attempting to turn around and sell them?..Thanks

Can you refurbish them yourself or do you know someone that can help
you? If you answer yes to either question, grab them. Otherwise, they
could be scrap value only.

Yup,,,,gonna have to erect a new tower in the new year. Good thing that pesky little height rule concerning 60 feet doesn't apply in this application. Never owned dual beams before....gonna be interesting to see what happens with both antennas aimed downwards toward the water..like skipping a flat rock across the pond. Might as well dig up the coax and replace that, as well. Conduit materials have improved since my last application. Might even buy a base amp..something I usually never need. Good friend of mine up north has an X Force keying a K..first Xforce I saw that really impressed me. The older ones I saw in years past weren't as hearty as this one. RFI is practically non-existent using his tribander. The skip is kicking daily from here to the northeast and is holding for several hours in the afternoon each day. Ditto for Arizona and the radio show in Phoenix..they were waving yesterday to the 'pile (to those of us they can hear) and making fun of the rest...especially those rabid, demented football freaks in Philthadelhia.
It's gonna be a great radio year in 2005!

Gee whiz Frank, I have never seen the idiot light come on while idling,
with a alternator. Back in the 60s, the ol man had a Ford F100 Custom
Cab, Red Bucket Seats (OH YEAH!) with a 292 Y block that had the old
generator that would light up the idiot light while at a stop light.

I modified a Bronco, removing the 170 CI six cyclender and installing a
302 V8, during the 70's and did business with Bill Stroup Racing in Long
Beach Ca. Dear ol Dad called them up and asked what could be done to
improve the horse power in his truck as the 292 Y Block wouldn't do
wheel stands and left him in the slow lane way too long. So Dad
installed a Lincoln 430 with the automatic tranny. WOW! what a
difference. We had to replace the 4:11 gears and the read end to a 3/4
ton rear end, and 3:73 gears. The Palomar 150 Tube amp made a high
pitched noise due to the high out put alternator, Biiitcheeeen!

Yeah good call there. I replaced the wimpy 35 amp alternator on my "Put
and Park Mini truck with a 120 amp alternator. And had to modify the
regulator to have a delayed response to charge the battery as the bigger
alternator tried to charge the battery as it the engine was trying to
start. The 4 pill amp amp really got up and barked then.

Is this advice from experience? I have seen many alternators tied
together and not noticed any noise. When the load is applied to the
alternators is when they will be putting out the high currents, and
voltage regulators will be monitoring the out put of its alternator.

I know at times the alternator diodes shutting off will cause a noise,
that can be cured by a bypass capacitor on the alternators output terminal.

Yeah thats how I think the AC Sky class of steel amplifiers are powered.
A alternator diodes are removed, and feeds a input of a 3 phase
transformer and it transforms the voltages to a much higher for the
tubes high voltage B+ voltages. And I have seen external diodes wired in
to allow more current capability.

I have seen the after market voltage regulator that allow the alternator
voltages to reach 18 Volts DC. Wonder how long the amps last doing that?

The

I am not saying this is a new idea, but a neat capability to have. And
one has to appreciate the work and ingenuity that goes into this type of
installation. Some of the guys have taken surplus Bird meters and added
them to the dash instrument cluster with back lights that look really
trick, that indicate voltage and current. A cluster of the Bird Meters
showing forward and reverse power, voltage and current look great.
Especillay when the mic is keyed and the back lights come on brighter.

I am planing to have my machinist drill in some small holes in my Bird Watt Meter Model 43, just above the meter, so that a row of small LED's can be installed that will indicate the Peak Instantness Power (PIP). Not the RMS value which is the PEP value, but a power measurement taken from the actual peak of the voltage, which will be a 3 dB increase in indicated power. And make ya feel that your getting more power out. A cheap way to make ya feel ya is ah gettin out hehehhehe.

I can rebuilt them myself if need be..But just the basics like replacing brushes,regulators,diodes etc..Never did any rewinding but I do have access to high wattage solder equip etc...But they are all in perfect functioning condition..They are just from some charter buses that are being scraped off to the junkyard because of age..I`m going to head down there now and grab several of the newer looking ones just for the hell of it..Even if I never use them once I test them and replace the brushes etc I should still be able to turn alittle profit on them as I am in the tractor trailer parts business and go to a bunch of repair shops everyday

Some of the newer cars have something like that built-in -- some of
them you have to rev the engine before the alternator will take over
the system and the alternator light goes out.

You probably didn't notice any noise because you were running AM and
the load drew down to the second alternator on key-up. Running SSB
would be a different story and your audio would include a 'clicking'
that followed the audio. But of course you wouldn't hear it anyway
because it happens when you are transmitting.

Anyway, stepped regulation is very hard on an alternator, causing
frequent surges through the field coil and regulator. They aren't
designed to work like that.

Depends on the amp. To be perfectly frank, if I used an amp I wouldn't
even mess with anything that runs from 12-14 volts. If solid-state I
would use 28 volt -minimum- for several reasons: power leads are
smaller and have less loss; transistors are more linear; efficiency is
higher because bias is a smaller percent of supply (CE bias can be as
high as 3-4 volts under heavy load, dropping nearly a third of your
supply voltage); voltage difference between battery and alternator is
smaller; etc, etc.

Maybe that's why Motorola designated their cheap CB amp transistors as
MRF454 and MRF455 -- to appeal to the 'big engine' mentality.

Bad choice. Don't let your friend get suckered by that "manager
trainee" line -- it's high-pressure sales, commission only, and high
turnover rate. For the same amount of effort you can make more money
selling used cars.

Being both a CBer and a ham, I'll make a - somewhat - different forecast
that largely says the same. No-code Technician ham licensing will make 2 meter
ham largely like CB is now - and the end of the 70s era of every car having a
CB has already cleaned up CB to a level near that of 2 meter ham.

The ID of fudge packer Steve Mopeydopey will shortly be outed. He thinks he is anonymous and bulletproof. He is not. All one has to do is look at the hundreds of posts he's made in dozens of non radio newsgroups where he insults, harasses and threatens to beat up people. He certainly has made dozens if not hundreds of enemies in NASCAR, gardening, and Ford groups. The AKC Delta Squad has been quietly contacting these victims by email, and it is certain that the clues gained from such contacts will lead us to the real name and address of the Medina Mope, after which a "boots on the ground" phase will commence.

Hey Peepeeholic:
Yes I am in Toledo. I have plenty of down home hospitality for you or
ANY of the other queens in here who wish to stir up some mess.
You wanna come by and visit? I will be delighted to send you back to
the MISTAKE ON THE LAKE with a thought in your mind that it was a real
dumb idea.
Imagine, Peepeeholic...Imagine...You come to my place and star some
junk...I put you face down and hurtin extreme, take pics of you laying
there with a bumped up noggin, and post 'em to the NG. I relish you
coming by. I am good in the callbook, just as I told your wife, the
trainedpuppet.
Have not had this much fun since I used to go cuttin' coax and
building jamming oscillators back when I was 16 yrs old.

Presently making covert op in region 8, bouncing this com signal off a Korean bird. Our mission goes according to plan. Make friends with the locals, convince them their enemy is our enemy, arm them, and instruct them in technique. We are winning hearts and minds and building an anti Steve Mopeydopey coalition. Grassroots effort turns up promising leads, including one NASCAR group member who was threatened by mopey and contacted his ISP.

What it is, little nutless weirdo sick freak, is you whining even way back then because you can't stop the AKC. Your absolute ineffectiveness was shown even that long ago. The good part is, you are too retarded to realize it so you keep giving your Masters more to laugh at.

Why don't you drive to an AKC'ers house and take pictures? Then you could post them on the web and act like you are some genius, and your gay buddies will line up to pay you for head. How about posting some easily accessed info about someone? Come on...let's see you REALLY be baaaaaad. You could make another threat about smacking someone around, or maybe how they "WILL" be sorry...those are also good. Good for AKC'ers to laugh at, that is.

OK, I'm done hoeing you for today...get your sissy self back in the kneepads and go back to the truckstop.

Now class, if you read the text below in blue you would have seen
the word "exit". Now, this lad meant to say "EXIST", as in
never again exist, not exit. One exit's a theater, one exit's a bus, etc.
It seems like this lad received a failing grade in spelling.
Either that or he/she (most likely a he) is really a moron, possibly
BOTH!! He seems to be one of the few morons who complain about things,
such as ham radio, taking a bath, brushing his tooth, etc. Since he
cannot spell, there is no chance of him passing the ham tests. He is a
moron who will live his life jamming the 40 channels and above. Please
don't get me wrong. Most CB'rs are good people. It is the few morons
that give us all a bad name!

So i said exit, so what? I still got the message across obviously, didn't i? as for passing the ham test, guess what i passed it a long time ago but then I realised the only people on those bands were a bunch of old men talking about their aches and pains, WHO CARES about their stupid health problems, I didn't get a STUPID license just to hear THAT CRAP. So I got out of the STUPID ham scene and went back to a REAL radio, GOOD OLD CB. But the cb band ain't big enough so the FREEBANDING WOLFPAC is TAKING OVER ALL FREQUENCYS SO THERE!

Hi!

The only useful purpose I've seen for these radios is using
them to travel down the road (on a trip) with two different
vehicles. The license fee request is a joke, unless you are
in a large metro area where repeater users may monitor you
and try and cause trouble ... like a typical R.E.A.C.T.

user would!

For coverage, a 5-watt CB with a magnetic mount could blow
away any FRS unit.

Just my opinion ..... and I prefer to use my "Direct Connect"
talkie on my Nextel phone.

Free quick easy money Amazing !!!!!!!!!!!!

HOW TO TURN $6 INTO $6,000!!!!!! READING THIS COULD CHANGE YOUR LIFE!
I

found this on a bulletin board and decided to try it. A little while
back, I was

browsing through newsgroups, just like you are now, and came across an
article

similar to this that said you could make thousands of dollars within
weeks with

only an initial investment of $6.00! So I thought, Yeah right, this
must be a

scam,but like most of us, I was curious, so I kept reading. Anyway, it
said that

you send $1.00 to each of the 6 names and address stated in the
article. You then

place your own name and address in the bottom of the list at #6, and
post the

article in at least 200 newsgroups. (There are thousands) No catch,
that was it.

So after thinking it over, and talking to a few people first, I thought
about

trying it. I figured: what have I got to lose except 6 stamps and
$6.00, right?

Then I invested the measly $6.00. Well GUESS WHAT!!... within 7 days, I
started

getting money in the mail! I was shocked! I figured it would end soon,
but the

money just kept coming in. In my first week, I made about $25.00. By
the end of

the second week I had made a total of over $1,000.00! In the third week
I had

over $10,000.00 and it's still growing. This is now my fourth week and I have

made a total of just over $42,000.00 and it's still coming in rapidly. It's

certainly worth $6.00, and 6 stamps, I have spent more than that on the lottery!!

Let me tell you how this works and most importantly, why it works....Also, make

sure you print a copy of this article NOW, so you can get the information off of

it as you need it. I promise you that if you follow the directions exactly, that

you will start making more money than you thought possible by doing something so

easy! Suggestion: Read this entire message carefully! (print it out or download

it.) Follow the simple directions and watch the money come in! It's easy. It's

legal. And, your investment is only $6.00 (Plus postage) IMPORTANT: This is not a

rip-off; it is not indecent; it is not illegal; and it is virtually no risk - it

really works!!!! If all of the following instructions are adhered to, you will

receive extraordinary dividends. PLEASE NOTE: Please follow these directions

EXACTLY, and $50,000 or more can be yours in 20 to 60 days. This program remains

successful because of the honesty and integrity of the participants. Please

continue its success by carefully adhering to the instructions. You will now

become part of the Mail Order business. In this business your product is not

solid and tangible, it's a service. You are in the business of developing Mailing

Lists. Many large corporations are happy to pay big bucks for quality lists.

However, the money made from the mailing lists is secondary to the income which

is made from people like you and me asking to be included in that list. Here are

the 4 easy steps to success: STEP 1: Get 6 separate pieces of paper and write the

following on each piece of paper;PLEASE PUT ME ON YOUR MAILING LIST. Now get 6 US

$1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will

not be seen through the envelope (to prevent thievery). Next, place one paper in

each of the 6 envelopes and seal them. You should now have 6 sealed envelopes,

each with a piece of paper stating the above phrase, your name and address, and a

$1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL!

You are requesting a legitimate service and you are paying for it! Like most of

us I was a little skeptical and a little worried about the legal aspects of it

all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they

confirmed that it is indeed legal! Mail the 6 envelopes to the following

addresses:

#1)Randall Hines 22 Stature Dr. Newark
DE 19713

#2) Mike Sharrer 921 West State St. Coopersburg PA 18036

#3) Jeffrey Hyun 17414Stark Ave Cerritos,CA 90703

#4) James Adair the third 22 Over Rd. Feasterville PA 19053

#5) TSR Solutions 15907 Golden Eye CT Parker CO 80134

#6) Daryl L. 6063 Roosevelt Blvd Apt# 216 Philadelphia PA 19149

STEP 2: Now take the #1 name off the list that you see above, move the other

names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as number 6 on the

list. STEP 3: Change anything you need to, but try to keep this article as close

to original as possible. Now, post your amended article to at least 200

newsgroups. (I think there are close to 24,000 groups) All you need is 200, but

remember, the more you post, the more money you make! This is perfectly legal! If

you have any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal lottery

laws. Keep a copy of these steps for yourself and, whenever you need money, you

can use it again, and again. PLEASE REMEMBER that this program remains successful

because of the honesty and integrity of the participants and by their carefully

adhering to the directions. Look at it this way. If you are of integrity, the

program will continue and the money that so many others have received will come

your way. NOTE: You may want to retain every name and address sent to you, either

on a computer or hard copy and keep the notes people send you. This VERIFIES that

you are truly providing a service. (Also, it might be a good idea to wrap the $1

bill in dark paper to reduce the risk of mail theft.) So, as each post is

downloaded and the directions carefully followed, six members will be reimbursed

for their participation as a List Developer with one dollar each. Your name will

move up the list geometrically so that when your name reaches the #1 position you

will be receiving thousands of dollars in CASH!!! What an opportunity for only

$6.00 ($1.00 for each of the first six people listed above) Send it now, add your

own name to the list and you're in business! ---DIRECTIONS ----- FOR HOW TO POST

TO NEWSGROUPS---------- Step 1) You do not need to re-type this entire letter

to do your own posting. Simply put your cursor at the beginning of this letter

and drag your cursor to the bottom of this document, and select 'copy' from the

edit menu. This will copy the entire letter into the computer's memory. Step 2)

Open a blank 'notepad' file and place your cursor at the top of the blank page.

>From the 'edit' menu select 'paste'. This will paste a copy of the letter into

notepad so that you can add your name to the list. Step 3) Save your new notepad

file as a .txt file. If you want to do your postings in different settings,

you'll always have this file to go back to. Step 4) Use Netscape or Internet

explorer and try searching for various newsgroups (on-line forums, message

boards, chat sites, discussions.) Step 5) Visit these message boards and post

this article as a new message by highlighting the text of this letter and

selecting paste from the edit menu. Fill in the Subject, this will be the header

that everyone sees as they scroll through the list of postings in a particular

group, click the post message button. You're done with your first one!

Congratulations...THAT'S IT! All you have to do is jump to different newsgroups

and post away, after you get the hang of it, it will take about 30 seconds for

each newsgroup! **REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU

WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200** That's it! You will begin

receiving money from around the world within days! You may eventually want to

rent a P.O.Box due to the large amount of mail you will receive. If you wish to

stay anonymous, you can invent a name to use, as long as the postman will deliver

it. **JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.** Now the WHY part: Out of

200 postings, say I receive only 5 replies (a very low example). So then I made

$5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent

me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5

persons respond to each of the original 5, that is another $25.00 for me, now

those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each,

I will bring in an additional $125.00! Now, those 125 persons turn around and

post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will

make an additional $626.00! OK, now here is the fun part, each of those 625

persons post a MINIMUM 200 letters with my name at #2 and they each only receive

5 replies, that just made me $3,125.00!!! Those 3,125 persons will all deliver

this message to 200 newsgroups with my name at #1 and if still 5 persons per 200

newsgroups react I will receive $15,625,00! With an original investment of only

$6.00! AMAZING! When your name is no longer on the list, you just take the latest

posting in the newsgroups, and send out another $6.00 to names on the list,

putting your name at number 6 again. And start posting again. The thing to

remember is: do you realize that thousands of people all over the world are

joining the internet and reading these articles everyday?, JUST LIKE YOU are

now!! So, can you afford $6.00 and see if it really works?? I think so... People

have said, &quote;what if the plan is played out and no one sends you the money?

So what! What are the chances of that happening when there are tons of new honest

users and new honest people who are joining the internet and newsgroups everyday

and are willing to give it a try? Estimates are at 20,000 to 50,000 new users,

every day, with thousands of those joining the actual internet. Remember: play

FAIRLY and HONESTLY and this will really work.

First off, anything illegal on here is off topic. So you keyclowns started being in TOS violation right off the bat.

Thats a big Bozo No No, we are not allowed to cut down the Joshua Tree's
and such. But some people do put lights on them. There is a commitee
that use to go around and count the darn tree's. New contruction is the
omnly way I seen them cut down and removed. I have a few tree's on my
property but there out of the way.

I have to agree with that. The 120 amp alternator I had on my put and park mini truck feed the vehicles system and of course charged the battery. I used a 4 pill Amp that had wild differances in current draw from almost nothing to a full on 80 amp draw. This was noticable when the engine was running at around 3000 RPMs going down the highway while talking SSB. It would end up stretching the single V belt that would only last about 4 weeks. I came to have several spares belts and made up a tool kit that would allow a fast change of the belt, as I got good at it from experence. As I had changed many belts, I finnialy installed the stock 65 amp alternator from just being sick and tired of having to change the belt.

Yeah I am sure thats possible, but the nerd linger who designates the numbers I am sure sets behind a desk and has his car serviced by normal people.

I would have a number like MRF-HP/454CI-Inc. hehehehehhehe

Matched transistors would go by Balanced MRF-HP/454CI-Hipo Inc
Or even PT2M454-Hipo Inc (Pettle to the Metal) OH YEAH!

Hello Landshark:

Yeah I remember my stock 45 amp alternator on the 170 six cyclender engine. I replaced the six 170CI engine with a 240 CI big six, but would have to had the front end lengthen a little. So another trip Bill Stroups place to get the factory V8 Engine mounts, that welded on nicly. I had a 1964 Comet Calenty that had a lot of head work done. So the heads went on a new 302 short block. Heads make a engine run.

The 45 amp alternator didnt last long with 4 each 100 watt off road aircraft landing lights. After a long night run at Pismo Beach California, 4 wheeling in the sand dunes and talking all over the place on the radios all night long, I could smell the alternator windings.

The next morning I checked the alternator and it was Ka-Put. Jim's Auto Parts and Machine shop brought me out a new 65 amp replacement alternator, right out on the beach where we where camped. Again the CB radio was a big help with the locals and such.

Perhaps, but they still manage a nice mile to mile and a half with their 3 inch antennas. And the FM audio quality would "blow away" any AM CB device.

But also on this supposed road trip a set of FRS rigs cost nothing to use. BTW they are very useful for antenna and dish installation work, Around the house, at the camp site, amusement park, boating, hunting, etc...etc...etc...

The FRS radio is pretty good for keeping track of someone in a mall. The building walls reduces chatter from the outside, too.

A few years ago an emergency situation arose on Mt. Hood. The climber in distress called on his FRS radio and a child in Yamhill, Oregon (about 60 miles away) heard it and told his father, who called 911. The climber was rescued and the the child received national attention in the news. So, FRS radios can go a good distance if the sightline is good.

The GMRS is interesting. $5 for a radio and $75 for a license.
FRS is handy for working on antenna towers and much less expensive when one is dropped 150 feet than a 440 HT.

Very important to do when converting a I6 to V8. If you don't
the engine will sit to far back and you'll have to pound in the

Yeah, contrary what a couple of trolls here say, they are a great help.
My Stroppe is stock with the exception of a Tuffy center consol, 200 amp
alt, dual batts. I've already been offered
$35,000.00 for it, but turned it down. I'll be in LA for
Fabulous Ford Forever in April (or March, never can remember) with it,
showing it off an Angelo's Burgers
in Anaheim the night Before.

I have a couple of the 4 watt radios. Use them at work. We started with a couple of the cheaper 1/2 watt, then went to a 1 watt. The 1 watt GMRS worked MUCH better where you were going from one building to another, but we still often had trouble. When I bought the Midlands the problem went away. Now if one of us is in one of the elevators we can still talk and it sounds clear. They have an option to use lower power if you wish. If you do not bother to buy a license and are not using them to try to cause trouble I doubt you would ever hear from the FCC.
I have never taken these outside to "test" the range claim. The best I tried was at the ocean once. One of the kids had a rented motor scooter. They could ride it to the end of the place on the beach where they had it marked as "no motor traffic, and we could talk fine. It was several ,miles away. They were long past where we could still see them. Range will depend a lot on whether you are out side, or in a building or car. When traveling with other people we use them and they work much better than a CB because they are so convenient. If you decide to buy some get the 4 watt. They have gotten so cheap these days you may as well get the more powerful.

Why are all these homo-ham operators doing on a cb post anyways? Don't the know that all cb'ers and freebanders are straight and they are the real homos, and don't the also realize that "their" bands are being taken over by us REAL radio operators AND having fun on them too, unlike THEIR EXTREAMLY BORING CONVERSATIONS that I hear. Yes we know how to have fun with OUR radios, unlike the poor uselees boring old faggot/homo ham operator!

Good GMRS radios (business band radios programmed to use GMRS channels) will have very good range especially with an external mag-mount antenna on the car. If you are licensed that is perfectly legal. There are also new GMRS repeaters popping up all over the place. The $75 (maybe $80 now) license fee seems high, but it will cover virtually anyone in your family for 5 years. Grandma, Grandpa, Mom, Dad, kids, etc.... If all the adults that will be using the license chip in on it, it's really not that bad. But if one person has to foot the bill, it's kind of steep. GMRS also allows you to use real mobile FM radios of the 25-40 watt power range, but they must be FCC approved UHF business band radios programmed for the GMRS channels. Duplex repeater operation is legal also as long as you are licensed, have a radio capable of it, and have permission of the repeater owner.

Because of electronic idle speed control systems: a lot of carbs don't
have them while most fuel injection systems do. Without those systems
the idle can vary quite a bit depending on the temp of the engine
and/or air, humidity, altitude, pressure, etc.

300 w world wide communicator said that. They talk allot of trash,
but in the end, it's all talk, no action.

All members of the HF pirate community, the new DX call frequency in
North America is 28.405 MHz. No licence is required, no code
necessary. Fell free to inject yourself at anytime. I just can't
figure out what that dit-dah-dit sound is. Who cares, I will just
talk over it. hehehehehehe

I am thinking about buying a 706mkIIg and converting it. it is a very
simple modifacation. and the radio is not that expensive, about $700.
Than I can just make a call up, a 1X2 because I am superior to all
but a few.

Catch me if you can.................

Wink at me
And I'll slurp up your pee pee
I am duggie

I'll do gayboy things
If you want me to
I am duggie

They are yours
My mouth and anal hole
Hammies, you've got full control
I am duggie

Pull another string
And I'll suck your ding a ling
I am duggie

Snap your fingers
And I'll turn gay sex tricks for you
I am duggie

Your wish for some head is my command
I'm the biggest fag
On the CB band
I am duggie

I'm just a queen
A fag-assed little queen
Why are you hammies so mean?

You have control
I do what I'm told
I'll do just anything for you
I am duggie

I am duggie

Just pull down your zipper
And I'll deep throat your dong
I am duggie

Make me get butt fucked
Or make me your gay slut
I am duggie

Use me hard
I love those hard gay tricks
Im a big faggot
And I love to suck on dicks
I am duggie

I'm your sukkin, fukkin
Jizz eatin' little faggot
I'm dyin for some cock
I'll blow the Anti flock

Blow you
Rim you
Triiiiiiiick fooooor youuuuu

Man the skip was excellent today on 27.555 Mhz and on 26.285 Mhz and
28.085Mhz (AM CH19 on certain select muiltiband cb BIG radios)and for
that matter everwhere from the 25Mhz to 50 Mhz CB band! I didn't hear
one (1) stupid ham on the old now defunct(10 meter) ham band at all
anywhere. It was wall to wall cb'ers eerywhere, good job operators
keeping the hams off OUR CB BAND 24 Mhz -30 Mhz and beyond!!!!!!
THE FREEBANDING/CB EMPIRE STRIKES AGAIN!!!!

Ok Lancer (whichever one you are);

>Please explain, (CE bias can be as high as 3-4 volts under heavy load.

A bipolar transistor requires both a BE bias -and- a CE bias.

>Ex: Class A, 6 volts for a 12 volt system.

For a Class A amp the DC bias on the base is set so the output is
centered in the linear portion of the curve (which is what I think you
were trying to illustrate with your example).

>Or are you refering to the losses in the transistor when its fully
>turned on?

Not necessarily. CE bias increases with collector current regardless
of saturation (and RF bipolars don't saturate easily). But if the
supply voltage can be increased while maintaining the same collector
current (by changing the BE bias), the loss due to CE bias is not
changed, and that loss is therefore made to be a smaller percentage of
the output power. IOW, the transistor is more efficient with a higher
supply voltage.

Correction: that should be "by maintaining the same BE bias".

I mistakenly assumed that the base bias would need to be adjusted
after an increase in power supply voltage, disregarding the fact that
some amps have regulated bias supplies.

5 years and N8WWM has single handedly turned a group of criminal keyclowns into his slobbering keyboard slaves. They post daily, driven by mad homo lust, preprogrammed by the chip the AKC has implanted in their brains. One keyclown was driven so insane he got in his car and drove hours to make a pilgrimage to the home of his master. We call this keyclown the mopeadope, because he is a dope and he mopes, hoping for attention from N8WWM, crushed when he found out Doug is heterosexual and disgusted by his gay advances.

truth you are correct.

n8wwm's superior intellect is proved by the condition of this group.

the keyclowns are on the run. they are trampled at every turn. they're only
pleasure is found in the restrooms of truck stops.

now the landfag is in the amateur groups begging others to report AKC posts
to their isp!!

is landfag not the queer-bait cocksucker who loathed the outting of keyclown
auctions??

now it is the landfag who is desperate for any out!but there is not out!!
AKC have again ruled the day!!

Well I think a lot has to do with steveo's love of WWM. Steveo is pissed off at the fact that Doug is straight and has a female companion. Steveo on the other is a flamming faggot who's "life partner" is landshark.

When steveo talks about his "snow plow" thats his gay speak code word that means he has been getting plowed in his ass by a trucker he picked up on channel 19.
yep, tough guy steveo. Thats one mean blowing machine.

Good site. I wasn't sure about that number. But still, 15,000 dead as
a result of a "pre-emptive" assault against 'possible' terrorism. We
only lost 3000 in the WTC attack and Iraq wasn't even involved.

Will the real terrorists please stand up.....

>In Harm's way:

I don't know much about WWI, but WWII was most certainly justified:
Japan was slaughtering Chinese by the hundreds of thousands, Hitler
had taken over most of Europe, England was near defeat, and the huge
scale of the death camps was discovered as the war came to a close.

Yet in -this- war...: Iraq had invaded one country but pulled out 12
years earlier; they did not attack the US; there were no WMDs; there
were no terrorist camps; the first thing the US secured after the
invasion was the oil, not the peace or the "hearts and minds" of the
people; and it took over a year of criticizm before Bush made any real
attempt to secure the peace, but only in one city -- a token effort to
silence the critics.

How can you characterize it any way -other- than "Bush's War"?

>> countless dead in Sudan from

It's even -more- tragic because it's happening in those other countries as well. And the US is doing practically nothing about it.

>> Civil War and growing ever closer to class warfare
>
>Do you really think so?

Absolutely. (CAUTION: Long-winded war story ahead.....)

There was an incident in Beirut that still sticks in my mind. While we were walking patrol one sunny day we passed through an Aristocratic neighborhood. Through the wrought-iron fence you could see a huge yard and a nice set of outdoor furniture near the house where the rich folks were sipping their afternoon sauce. Just then a few mortar rounds came in less than a click away so we scrambled for cover. I could still see through the fence. Those people lounging in the yard just turned their heads in the direction of the blasts. Then after a minute or so they turned their heads toward us, pointed to the mortar blasts and started yelling at us to stop the noise. They didn't have a clue as to why there was a civil war, who was fighting it or how many people were dying -- they were just annoyed because the war was disrupting their lifestyle.

(End long-winded war story)

How many German, Italian, French civilians died
during WWII? Way more than did in the attack on
Pearl Harbor and they weren't the attacking nations.

Man you got that right. How do you know who's

Yup, selective enforcement. If your going to bomb one

doing it. You & both know the US won't do that. I'll bet

Hello Frank:

This maybe a little long winded but I learned something neat here.

That's a good call having separate amp meters off each alternator.
I am sure one alternator will want to source most of the current, but thats ok, as the second alternator will have to kick in when the load is applied. When the load goes nutz-oid wanting a Bazillion amps I am sure the output current will be close to equal, if the voltage regulators are set close to each other.

While working as a marine technican/electrican for several years, in Los Angles I was called to a boat having alternator problems. I talked with the boat owner and came prepared with a new marine grade alternator and regulator.

The boat had two engines and each engine had 2 alternators. As the electrical system needed a redundant back up everything as it did research and commercial work out at sea for long periods of time. Time is money and money is time stuff here.

The owner said that when the Engine #1 auxiliary alternator was placed on line the running voltage did not increase as with the normal main alternator did. Same for #2 Engine.

Well as the engines where running the main alternator was carrying the load and you could not see the auxiliary alternator come on line by just looking at the systems 24 volt system voltage. After pulling off the field wire from the main alternator, we verified the auxiliary alternator was really working putting out the needed current to run the boats 24 volt electrical system. The auxiliary alternators where placed on line by a lever that over centered and locked into place tightening the belt that turned the alternator pulley, pretty neat!

Ok so everything was working as we verified the alternators, batteries, and had to replace a few battery connections. No big deal.

The owner asked me to check out the electrical system #1 and #2 cross over operation.

The boat or really a ship had to have two of everything, Two: HF Radios, VHF Radios, Lightening Systems, Engine Indicating Meters and Indicator Clusters, CB Radios, and of course all of the Nav Electronics like Radars, ADF, Loran, Depth Finder, Automatic Pilot, and bunches of other stuff. Ok so every thing ran off the 24 volt system #1 or #2.

But they didn't know how the electrical system #1 and #2 crossed over or ran the other system when one of the engines was shut down, and wanted to know how to operate and test it out. I didn't know either as I couldn't find a cross over contactor relay any where.

After looking over the ships wiring diagram, I saw the cross over contactor or relay, it had to be turned on (by a switch in the wheel house) to allow the two electrical systems to be tied together for high current operation.

But the neat thing that I found was that the two electrical system where tied together thru a calculated resistance, in this case a short length of 8 gauge steel wire that would only allow so much current to flow between the two electrical systems. This allowed the system #1 to be up and running and be able to run a few things on system #2, and charge the system #2 batteries, and visa versa. This also allowed the main system running to not be pulled down by a short in the other system.

The electrical control panel in the wheel house showed all the alternator voltages and currents. You where able to select which of the 3 battery sets to start the engines, pretty neat. They had a small 4 cyclender gas engine that ran again two alternators and a hydraulic pump for a auxiliary back up. And a gas powered Honda Generator mounted just aft of the wheel house to supply 12, 24VDC, and 115 VAC for a back up back up. Neat stuff.

So a calculated resistance coupled connection between two alternators would allow the alternators to run separated systems and allow say a second alternator to back up the other system while not loading it down. Food for thought.

Remember that a bipolar transistor is a -current- amplifier, not a
voltage amplifier. Saturation is a characteristic of the collector's
-current-; the CE bias is a characteristic of it's voltage. The two
terms are often used synonymously and saturation curves are really CE
bias curves, but that's because 'saturation' has two definitions:

First, it is the point where a device will no longer respond to an
increase at the input. This can happen for many reasons. But in this
case it's because the output has hit the rail, and the rail is the CE
bias (explained later).

Second, it's the point where a transistor is driven so hard that it
causes a forward bias of the BC junction (bad news).

Now..... I'm not trying to dumb this down, but simplification might
help to consolidate our differences:

Consider a transistor configured as a DC constant-current source; i.e,
base bias is fixed and therefore the collector current is constant.
Let's say the collector current is fixed at 1 amp. That current is

constant regardless of the collector voltage..... to a point: Let's also assume that the CE bias is 2 volts when collector current is 1 amp. If the collector voltage drops below 2 volts then the collector current will drop. Therefore, the voltage required to put the transistor into the constant-current part of the curve is the CE bias.

Now let's configure the amplifier for Class B, use a 12 volt supply and feed it some AC. If the peak output current is 1 amp then the maximum possible voltage output of the amp will be 12 volts minus the CE bias of 2 volts, or 10 volts. If the CE bias increases to 4 volts at 10 amps (realistic value) then the peak voltage can be no larger than 8 volts, or 2/3 of the power supply voltage.

Ok, now let's double the power supply voltage. Since the collector current doesn't change then the CE bias doesn't change. The output can now swing 20 volts, or 24 volts minus the CE bias. And this is 83.3% of the ps voltage. Since the current is the same regardless of ps voltage, the efficiency is 25% better with the -higher- ps voltage.

<snip>

Exactly. A smaller percentage of the input power, and therefore more efficient.

Current equalizing resistors is another way to do it. It's common
practice in SS audio amps to use emitter resistors to equalize the
currents between parallel transistors. But I would hesitate using them
with modern alternators because I don't know how it would screw with
the regulators -- some have a local sense line and others have a
remote sense line -- a resistor in the load might send the regulator
into seizures.

Well....almost. This war HAS been Jew vs. Arab since sons Isaac and
Ishmael and father Abraham. Their feud literally is what began this
conflict. Son Ishmael was born of Abraham and his handmaiden. The
Christian faith believes the promised land was to be Isaac's, born of
Abraham and his wife. The muslim faith believes it belonged to Ishmael,
as his mother, Abraham's handmaiden, was of Arab descent.

Bin Laden's stated number one goal a few years ago was to "draw the US
into the Arab conflict".
For the sake of argument, let's drop oil from the equation. What is
left? Protect Israel at all cost...which is exactly what we have always

done. In fact, the US gave Israel THE bomb. The US allowed Israel to smuggle many tons of uranium from a certain facility in the 60's. Johnson was aware of it and tried to crush the investigation for whatever reason. After many years of investigations and hearings, it is generally believed the US -wanted- Israel to have nukes as a deterrent against their "hostile" neighbors, and looked the other way as an ISRAELITE was uncharacteristically given "Q" clearance in the US and was head of the nuclear plant from which many, many kilos of uranium went missing. He was never prosecuted, despite a lifetime of investigations. By the way,,did you hear Rumsfeld slip the other day and say "the plane that was shot down over Pennsylvania on 9-11"..?

I seem to forget, what nations had Iraq invaded in the past 10 years again? How large was the WMD program in Iraq again?

I remember that after the limited victory of Afghanistan massive stories of Al Qaeda information and supplies were turned up in areas around that nation, have any high ranking Al Qaeda's even been captured in Iraq.

Though Bin Laden now is a power player in Iraq, as are the Iranians. In fact the fight over the elections is between the Iranians, who want them to take over the country, and Al Qaeda and the Baathists. With American troops getting killed in their fight.

I heard that. He was referring to the hijackers: "....the people who
attacked the United States in New York, shot down the plane over
Pennsylvania,...." With all the people on the plane talking on their
cell-phones saying they were going to re-take the plane, I really
don't think it was shot down. Rumsfeld probably meant to say "brought

6051. Why Keyclowns Fear N8WWM And His AKC

Why Keyclowns Fear N8WWM And His AKC

5 years ago, the rec.radio.cb newsgroup
was a keyclown sanctuary and a training
ground for criminal CBers. Amp sellers,
golden screwdrivers, loudmouths, tweakers,
drug dealers, and know-nothings ran free.
There was no tech discussion, aside
from "who's amp is loudest". CB myths
like 18 foot coax length were taken as
gospel. CBers were told to open up
their radios and mess around inside,
encouraged by so-called experts.

These so-called experts didn't tell the
new CBers that by expanding their radios,
they might be on ham frequencies or
even air sea rescue channels. They didn't
tell them that the Skullcracka or XForce
amps they so dearly loved would interfere
with other radio services. They didn't care.
It was not so much a radio hobby but a
criminal lobby. No one questioned
keyclownism and the sissy homosexual
values that went along with it.

The mighty N8WWM changed all that.

With his timely, powerful, and brilliant action,
he initiated the eBay auction ratouts,
ridding the nation of dangerous keyclown
gear. He reported keyclown sales websites
to the FCC. He predicted the problem
of 10 meter trucker bootleggers before
most law abiding CBers and hams
even knew about it. He reminded keyclowns
daily that they were subhuman federal
lawbreakers.

Working alone, he built the AKC from the
ground up, trained its members, and set their
course for the future. But in doing so, he
paid a price - he became the focus of
keyclown attention and the main target of
RF thugs and gay fairies the world over.

Each year hundreds of CB keyclowns whimper
and drool over photos of N8WWM, mooning over
his superior genetics and handsome appearance,
wishing they could be heterosexual like him, but
knowing they are doomed to the despair-pit of
homosexual girlish queerness. This warped man-lust
drives a few keyclowns clinically insane, and some
make a desperate pilgrimage all the way to Ohio
in hopes that they might get a glimpse of their love object.

This emotion also drives these same-sex-crazed
limp-wrists to forge N8WWM. In their keyclown
hearts, they WISH he were gay like them. They WISH
he were a dedicated criminal like them. They
WISH...but their wishes never come true.

They can do nothing. They are powerless.
They are keyclowns.

We have N8WWM to thank for this. Someday there
will be a plaque at ARRL headquarters honoring
this great man. "He stopped keyclownism at our
gates", it will read. Future generations of hams
will honor N8WWM, for he stemmed the tide
of gayness and exposed the criminality of
keyclowns.

We were friends with Iraq for a long, long time. If we let Kuwait happen,
Saddam would have given us great rates on oil. He never once voted in an

What "behavior"? First you went ballistic about "responding to forges",
which I STILL don't what the hell it's about, then next thing I'm "dialing

southern/southeastern company (as far as I know). What the heck is going

Well, one thing I agree with is that's Edwards was probably the
-WORST- pick for VP he could have made. It's probably what lost him
the election. BTW, is the Ohio recount getting any press in Ohio? It
sure isn't making the national news. I hear Blackwell & friends are
trying to prevent the courts from learning about his secret election
procedures. Sounds mighty crooked if you ask me.

It has had a little press but not much. Last I heard GB was something
like 120,000 votes ahead, with no chance of JK closing the gap. That's
pretty damn close actually.

Yes. George has the letter on his wall.

Why? We had no love for Kuwait. They hated Americans. No different than any other Muslim country. However, Saudi Arabia figured they were next, and they had 35% of the Mideast oil; way more than Iraq had (even after taking Kuwait).

> Maybe we should have let him launch scuds at our allies too.

If we did not kick Saddam out of Kuwait, he would not have sent scuds to Israel. He was secular. He only did that to gain support of the Muslim community after we betrayed our friendship with him and sidled up to the fundamentalists in Saudi Arabia.

> Never trusted that guy.

Nobody liked Saddam. He was just a necessary evil. And being secular, he was certainly no worse than the heads of state in Syria and Saudi Arabia.

But not because you voted for him. You just happened to agree with the
predetermined outcome. If they get away with it in Ohio then that's
the end of free and open elections in this country -- 228 years gone
to waste. I don't know about you but that pisses me off.

Hello Stevo:

Yeah there is a few Interceptor 10K Antennas out there as marine antennas. The fishermen call the CB the Mickey Mouse, but with a good antenna can make real long contact distances. So some of then have gotten ham license and talk on 10 meters as it is empty most of the time. I have gotten reports back on 50 to 60 miles over the water. These guys are up on 29 MHz simplex FM.

That's a fairly odious boat antenna..could you run it without the ground plane radials, and use the water for a counter-poise? That would sure lighten the friggin' wind load a bit.

I was only ribbing ya a bit, Jay. I've been real happy with mine. (not on my boat)

I'm not a Democrat or a Republican -- I'm an American. I didn't vote
for Bush or Kerry because I don't think either of them are qualified
for the office. And for that reason I really don't care who won this
election. But when it comes time that I -do- care I want to know that
my vote is counted and that the election is legitimate.

And the issue is not dead -- far from it. It's just getting started.
Almost every voting rights organization is criticizing the voting
fraud that occured in Ohio. The evidence of fraud is well documented
and the election results are being contested based on that evidence.
Don't believe me? Browse the internet on the topic. Check out the link
I cited. If you can't handle the whole site, at least check out this
page:

http://freepress.org/departments/display/19/2004/1044

No, the issue is not dead. Not until our elections are more legitimate
than that of the Ukraine and other countries, elections that the US is
quick to criticize when problems occur -- problems like when exit poll
data doesn't fit with the official results.

What I can't understand is why some people are so defensive about the
issue. Do these people think that the legitimacy of Bush's victory is
so shakey that it can't handle scrutiny?

Do people want Bush or do they want a democracy?

That's kinda his mantra. His arm is under the microscope for this deal to
happen..the Indians are really tight with their cash since Jacobs sold the
team. I'd say he's worth a shot on a one year/7 mill deal. Reckon?

Hitler wanted to take over the world. Saddam was just pissed that Kuwait
was cross drilling and stealing Iraqi oil.

If you want to synchronize generators (or alternators) you need a
chain, gears, or a toothed belt. You can't use smooth belts because
they slip. That's why your car has a timing chain to drive the
camshaft, not a timing belt (unless you own a Pinto which had a
toothed timing belt -- one of Ford's "better ideas").

I did vote. I just didn't vote for Kerry or Bush. They weren't the

Put two pulleys of equal diameter on a belt, put timing marks on them
to indicate their phase relative to each other, then run the belt for
a few minutes. I can almost -guarantee- that the marks won't be in
phase when the belt stops. If they are, run the belt for a few more
minutes and they won't be in phase. That's because belts slip.

Well, maybe you should look at the "About" page from the site. Check
out their history and examine the credentials of it's staff. Then know
that that's not the only organization making these claims. There is
also the National Voting Rights Institute. Both of these organizations
have cried foul in Ohio. And both are staffed by well-educated people
who often serve as official election observers for the US and foreign
countries. If you want I can give you quite a list of many other such
organizations -- most of them non-partisan -- who agree that the Ohio
election was a sham.

> Don't you think the democrats
>stole votes too?

All the more reason to investigate the issue. It would be fantastic to
see both parties shot to bits in this fiasco -- it would bust up the
two-party cartel and force open the door for third-party candidates,
giving the voters some real choices!

> Each area has democrat and republican stronghold who run
>thier local governments. The people who run the voting booths can see how
>who didnt show and cast a vote for them. Let me ask you this Do you have
>a better idea how to stop this from happening for either side??

Check out some of those organizations and the problems with the Ohio
election. Chances are that many of the problems will be solved by
court decisions and legislation. That way there won't be any more
people conducting the election while being campaign manager for the
state. And the companies that own the hardware and write the software
for the voting machines can't be a major contributor to one candidate
(let alone promise to hand that candidate the state's electoral
votes). Anyway, they are the experts, not me. See what they have to

say cause they say it better than I could.

What pisses me off, is we stepped in to save Kuwait's ass, then they have the balls to vote to raise the price of oil which they know damned well creates problems here. The next time they need help, we should let them get their asses kicked and then mop up - IF it suits us to do so. It never fails, we help out others and get kicked in the teeth for it in the end.

They say we're not giving enough money for this disaster... What the HELL did they ever give US when we were being devastated with our own problems such as Ivan which did MILLIONS of dollars of damage from Florida up the East Coast. Money which our government is still paying out for damages. If they don't like the money us tax payers are giving them, maybe we should reconsider giving them NONE. It's time we close our checkbooks to these people and start doing more for our own. Taxes are going up everywhere with no end in sight to pay for many things. Yet we still pump MILLIONS into the other countries. SCREW THAT..... They don't do dick for US. Foreign aid should be eliminated. The only money offered to us after 9/11 had conditions attached to it. I'm glad they had the balls to tell the Arabs to shove it. We don't need their bribe money. We pay for everything else, we'll get by just fine without their stinking money. We were down, but by no means out.

mopeydopey aint a menace unless you count the fact that he goes through so many pairs of kneepads a week that sports teams have to hijack trucks to get any at all for themselves.

A menace? Hardly. She's a dweeby little assclown with a sick mind. We get good laughs off mopeydopey. Long may he hit the truckstops each night, giving so much joy to truckers that every morning he has to brush his teeth with "Goo Gone".

Not sure if you were trying to post to the group or not - it only went to me. I picked the radio up new but I rarely heard anyone on the CB channels. Someone later told me there isn't much CB activity in this area and soon after I got my ham radio license. Not sure how much the accessories run for - never priced them.

that may not be far from the truth, niggers are converting to islame as fast as their dirty asses can run. Among nigs islame is the fastest growing cult world wide(because niggers are stupid and will believe anything as long as it has a shinny wrapper on it and is written in simple language) so in the not so infinite wisdom of the vatican a black or africoon pope maybe in the works to bring niggers back to the church

I understood your "clash of social class" but the fact that
they sat there like snotty rich snobs and complained about
the noise of death & mayhem during a civil war, that
would piss me off more. Your there to help them, protect

I figured out why 2 of my 4 units did not work.
I tried 2 cb shops and they were of zero help.
If the mic goes bad, the sound will jump from
silence to booming. If the mic is good, the
sound will gradually go from silence to loud.
Apparently the mics (volume & channel in mic)
become corroded and fail after many years...

I have no clue why you feel you are being slammed, persecuted, nor why you have the need to falsely accuse others of "going ballistic" for merely pointing out your errant behavior of responding to forges. But it's fun to watch your self-degradation.
Referring to yourself as "Lt. Colonel" when speaking to Florida is an ego thing, Jerry, as your rank (unlike the army, navy, marines, or af) is not recognized by civilians. Stay with Tennessee and Georgia.

Phase? The control voltage is DC, the output is DC, am I missing something?
Wouldn't you just want the outputs to be at the same level?

The control (field) current is fluctuating DC, isn't it? Isn't that
how the regulator smooths the output (which would be fluctuating DC if
the field current was steady)?

>Wouldn't you just want the outputs to be at the same level?

That's the plan. But regulators are like little kids with a new toy.
When you put two or more regulators in parallel (without current
equalizing resistors) it's almost impossible to make them share the
load equally.

Re-read your history books: The US and several other UN nations were
there to keep Israel and Syria from starting WWIII in war-torn
Lebanon. If Lebanon's neighbors stayed behind their borders the US
would have let the civil war continue unabated because we had no
interest in that country.

Ho hum. I still I don't know what you are talking about--
or CARE for that matter. If I responded to "forges", I didn't know it was

Phase? The control voltage is DC, the outputs are DC, am I missing
something? I know that the output of an alternator isn't "pure' DC,
but it will never be 180 degrees out.

Auto alternators are three-phase alternators. As such, the rectified
output never drops to zero, but it does have significant ripple. The
regulator obviously controls the DC component. So I guess the question
is if the regulator also smooths the ripple. If it does then parallel
alternators must be locked in phase. But if it just controls the DC
component then current equalizing resistors will do the job (although
I would think about putting a ripple filter on the sense lines).

"Oculocutaneous albinism (OCA) is a rare, genetically inherited condition passed on by both parents to their offspring, resulting in a significant reduction in or absence of pigmentation in the hair, skin, and eyes at birth. Individuals with albinism are very fair-skinned and fair-haired, with (most often) blue eyes that can take on tones of purple or red in bright lighting.

But due to such lack of knowledge as to why their "white skinned" off springs came about, African mothers and fathers became more and more fearful and suspicions and began to separate their growing number of "white skinned" off springs away from the "black skinned" (pigmented) population.

Eventually most of the "white skinned" off springs of "African" mothers and fathers formed several groups and began to migrate northward through Egypt to another area of Africa which is now called Europe, seeking a more hospitable living environment and to escape the intensity of the equatorial hot climate of the great river valleys and great lakes region of Central, Eastern and Southern Africa which was then and still is South of what is now called Egypt.

The "albino" group moved up in the mountainous area during the Ice Age or Glaciations period that lasted thousands of years further isolating themselves from their original parent population in Africa. And by being in such isolated living condition for such a prolonged period they also interbred (within the existing parent groups) thereby creating additional "albino" off springs from "albino" mothers and fathers who were then and still are direct descendents of African mothers and fathers.

Some theories equate Albinos with the origin of the Caucasian Race. This website has many validations for the origin of the Negroid Race, but what about the Caucasian Race? Certainly Frances Cress Welsing hit the nail on the head with her book, The Isis Papers (1991).

The White Race has the genetic inability and absence of melanin to produce the different skin pigments seen throughout the world....."

We've all learned to excuse your racist ignorance because we all know that due to your lack of knowledge of your true self, you are only able to vent hostilities towards blacks and people of color. Go take your psych medications, and then get back in your cage!

Alternators deliver 3 phase, approximately 120 volts output at working RPM.

Well... you're right about the part that it's better than the
thru-the-window antennas... but any CB antenna shorter than about three
feet performs very poor indeed.

I was pointing out, not so clearly though, that alternators deliver 3 phase voltage, 120 degrees out of phase, just like any wye or delta power system. This produces cleaner AC to be rectified into smoother DC. I was actually addressing Lancer's statement. You are correct. An alternator does not produce DC until after the 3 phase AC is rectified.

Yes I know that, The output (at least on most automotive applications is
DC.)
I have seen modifed alternators with 3 transformers on them to provide
higher voltages for B+ for transmitters.

I still don't quite see why you would need to have the alternators run in
phase. If you were taking the 3 phase out before rectifying it, yes.

Faggot Yoga:

Overview of faggots, faggot sex, Faggot Yoga and the faggot author
Faggot Yoga is a system of practices taken from traditional yoga teachings and modified ("perverted") to deepen and intensify faggot sex, especially to explore enthralling altered states of consciousness ("ASC") that I and other faggots experience during faggot sex. (One popular name for an ASC is "sub space" entered by a submissive partner.)
Faggot Yoga also teaches how a faggot can use his faggot sex drive and faggot sex experiences as sources of energy and insight for development, including spiritual development.

A faggot, as I use the term, is a man possessed by Abusive Male Power. The Power compels the faggot to engage in faggot sex -- erotic activity centered around Abusive Male Power, conveniently described in terms of "Control, Cruelty, Contempt." Most faggots are submissive and must serve a Man who channels and expresses Abusive Male Power. Other faggots are dominant and, although possessed by Abusive Male Power and compelled to engage in faggot sex, enjoy the pleasures of abuse. Many faggots, including the faggot author of these pages, are submissive under some circumstances and dominant under other circumstances.

I am a smart, tough, older faggot and have lived most of my life among faggots in and near San Francisco. I enjoy faggot company and have loved some faggots. Since I was small, I have explored my faggot nature with an ascendant spirit, with a creative intelligence and with a selective but hearty appetite for abusive sex perversion.

The thrills of faggot sex.
Faggot sex is hot. None hotter.
Here is an attempt to describe the experience of an altered state of consciousness ("ASC") that drives a faggot nature and that is the central experience of Faggot Yoga. Faggot Yoga teaches that you should focus on each physical, emotional and mental detail experienced during a faggot sex encounter; such a "focus" practice is the best way to describe the ASC of faggot sex. Too many words would be needed to properly describe what goes on, but here is a crude attempt.

You are preparing for faggot sex with a dominant man into aggressive buttfucking. Following Faggot Yoga principles, you observe that you are anticipating the intense sensations you expect to feel. Fear turns into sexual desire, sexual desire signals to you that you will submit to this man and his abusive intention, the realization leads to more fear and more desire...

While preparing (e.g., using a douche or fingering), you clearly identify each of the physical sensations centering on your asshole but extending throughout your body. The body that you think of as your own is to become the property of another who has a different attitude toward your body and toward you. This is what it means to be a faggot. As the reality of your faggot nature and of the approaching faggot sex encounter are brought clearly into focus and coincide, you enter into an eager expectancy, like watching the opening credits of a first-run movie you are sure you will love.

This faggot sex encounter is good sex. The Man is steady and sure with his voice and with his hands. He simultaneously reassures you, guides you and dares you onward. The pace is moderate. Nothing is threatening -- yet; but the direction is clear.

Your faggot sexuality, aroused in anticipation, now pours into you and over you. This Man now embodies male Power that you hunger for. You respond with growing passion to the sensation of his skin on your own, to the ferocity of expression now appearing in his face, to his smell, to his hardening cock. You need to yield to this Man and you do yield to him. He takes advantage of your submission and mounts you.

The actual penetration is a climactic moment that is inescapable and you experience it fully, attending to the involuntary connection in your own self between the intense sensation of the penetration and your submission to it. Perhaps you experience the penetration as a violation of yourself that is felt as a loss of control, experienced in your asshole when you shit and when you get fucked. Perhaps the loss of control and the sensations of involuntary penetration combine erotically for you.

As the Man's energy rises and his fucking becomes more aggressive, your submission to him grows deeper. Something beyond your control dominates you, alters your consciousness and transforms you from what you were during everyday life. Aggressive buttfucking demands total and complete attention and you find fulfillment in complying with that demand. Where before, there was emptiness inside, now, during aggressive buttfucking -- there is completion. Where before, there was fear and drift, a general anxiety-- now you have become a vehicle knowing only service to your driver. Where before, a mask had to be worn -- now your faggot self is out in the open. You are taking abuse a faggot ought to take and it is right for you to be taking it. Aggressive buttfucking rubs the wound at the center of your faggot self, but the pain of that wound now becomes unspeakably voluptuous pleasure.

Developmental program for faggots: conscious experimentation and growth.
Most faggots feel that their sexual nature is a source of of poblems. In my experience, a faggots' sexual nature is not going to change. On the contrary, the faggot is going to become more solidly attached to his faggot sexual nature through hot faggot sex and involvement with fellow faggots. A faggot needs faggot sex. However, faggot sex is not

strongly supportive of a permanent relationship and regular, satisfying faggot sex may be difficult to find.
My approach is to use conscious experimentation to avoid the problems of the situation and of my particular place in it and to find opportunities for adventure and growth. Growth means adding new activities without abandoning familiar activities. I have developed repertoires of activities. The purpose of activities and of growth is depth exploration of the ASCs of faggot sex, both my ASCs and those of my partners.

The most important thing about faggot sexuality is that it is almost entirely a matter of consciousness. If your sexual consciousness were directed toward nonabusive partners and activities, e.g., you wanted a vanilla domestic relationship, what would be in you that you would call faggot?

"Faggot sex is a matter of consciousness" sounds like "the most important sex organ is the brain." Yes, the main message is the same; but, "consciousness" is a much more useful concept than "the brain." I can change with my own consciousness (and talk about it too) while you need a doctor to do anything purposeful to a brain.

I am, of course, talking about possible changes in consciousness, like changing the channel on a TV without changing the content provider, like a cable company. If, by reason of your sexual nature, your sole content provider is "The Faggot Sex Cable Company," you will find faggot on every channel. The idea of faggot conscousness is to get more and better entertainment with your existing content provider.

My approach is to use disciplined consciousness of my participation in faggot sex, especially while entering into and dwelling in the ASC's of faggot sex.

Disciplined awareness is the maintenance in consciousness of images of Reality that are based on activities then occurring. Awareness is "here and now" and the discipline is to maintain awareness continuously both in time and focus. For example, Faggot Yoga teaches that a faggot should keep his eyes open during faggot sex and a faggot should consider himself bound to attend entirely to the Man. A faggot should not indulge in fantasy, e.g., a faggot should not entertain himself by pretending that he is acting out a favorite masturbation image.

Disciplined consciousness is awareness plus directed detailed attention. The directions for your attention are specified by the activities. For example, when playing a board game like Monopoly, your awareness includes your mental image of the board and your directed detailed attention shifts from the dice to the tokens to money to pieces of cardboard, like deeds, according to what is happening in the game according to the rules. In Faggot Yoga, the activities are those by which Abusive Male Power induces the ASC of faggot sex. A faggot subject to Abusive Male Power should fully experience what is holding him captive and consuming him.

To see the Power of consciousness in faggot sex, consider how important consciousness is to "the involuntary connection in your own self between the intense sensation of the penetration and your submission to it" discussed above in "The Thrills of Faggot Sex." The connection cannot take place without your consciousness of it; i.e., the erotic arousal that drives your submission depends critically on your consciousness of that which arouses you. At the same time, voluntary action, which might be considered the proof and purpose of consciousness, has been rendered inoperative. The connection that drives submission takes place without volition and even in the presence of volition that would oppose submission. Consciousness is present but impotent while the faggot erotically responds to, indeed loves, Abusive Male Power enjoying the pleasures of Control, Cruelty, Contempt by abusing the faggot . This is the condition of faggot sexuality that make faggot sexuality compulsive. The compulsive nature of faggot sexuality is central to Faggot Yoga.

Practices of Faggot Yoga
Faggot yoga is a system of practices. A practice is an action pattern that is repeated with purposefully-directed conscious attention to form and manner of execution.
I would expect any faggot pursuing a faggot yoga program to select those practices that are meaningful to him and to adapt any practice to his own use. My own practices are stated below. My experience is that when I am thoroughly engaged in my practice, my entire life is suffused with a bliss state that is a continuation into mundane activities of the ASC of faggot sex. The bliss state is absent when my practice is not thoroughgoing and my experience is that the bliss state is induced by the practice.:

Faggot Yoga practices:

Disciplined consciousness during faggot sex. This practice is the most important but not suitable for verbalization in this medium. Faggot sex may include stimulation of erotic sensors but personal preferences are all-important and may include bondage, painful and/or tormenting sensations, sensory deprivation and/or emotional domination/submission using gross insults, contemptuous physical engagements and/or obedience training; or, in general, whatever pervert minds can conceive.

Pranayama or traditional yoga breathing exercises. Materials on this practice are readily available elsewhere on the Internet. Pranayama can be combined with many faggot sex activities, e.g., bondage, cocksucking.

Chastity, in the sense of a semen-retention discipline where intervals between emission are progressively extended until emission becomes rare or non-existent. Chastity is now a popular bondage activity and materials on methods and approaches can be found on the Internet. The experience of yoga practitioners, emphatically including your author, is that strict chastity discipline supercharges sexual energy and pervert development and leads to a bliss state. Chastity can be combined with many faggot sex activities.

Deity-worship, described below.

Integration of Faggot Yoga into a modern lifestyle with multiple persona and taking advantage of the healthy aspects of yoga teachings, including abstinent diet and physical exercise.
Deity-worship is important in many forms of yoga and is the focus of my Faggot Yoga practice.
Hinduism teaches that there is a Universe (or plenum) of powers in which every power that could exist does exist and in which all are existing together. (If the Semitic view emerges from the desert, the Hindu view emerges from the jungle.) Each person is drawn to the power appropriate to him.

For me, the appropriate Power is the Power that made me into a faggot, the abusive male Power that dominates me and to whom I render worship and submission, including my participation in faggot sex. My submission to my personal deity has extended over the whole of my life, including my intellectual life, and one of my intellectual productions seems the best way to express myself about my personal deity, at least in this public forum.

Practices of deity worship include my Faggot Yoga version of mantra, which involves writing and reciting "verses" (in yoga terms, slokas) that purposefully direct my consciousness toward my relationship with my personal deity. A simple sloka I can recommend to anyone is as follows: "In the center of my spirit, I know that I need a Master. Through my practice of this mantra, I prepare for my submission."

A sloka has two lines with 16 beats in each line. A sloka can be repeated to oneself while waiting on line, walking on the street, exercising or performing pranayama. More useful slokas are crafted for the particular individual and exhort the individual to proceed in furtherance of his personal program of submission to his personal deity. Slokas are organized into structures. By repeating appropriate slokas, the practitioner seeks and obtains guidance and direction from his personal deity. Mantra is a form of submission in which the practitioner voluntarily engages in brainwashing himself for the sake of the Power he serves.

The yoga tradition.
Most people think of yoga primarily as bodily stretching exercises that sometimes look like "pretzel shapes." Although bodily stretching is part of many yoga programs and good exercise for a faggot who must accommodate himself to sexual positions and acts where his comfort is of little concern, yoga practices in Faggot Yoga are primarily mental and can be done without bodily stretching.
A brief background is needed. In general, yoga is a collection of practices used to explore various states of consciousness, some quite remote from those experienced during daily life. Yoga practices have been known since prehistoric times, have been employed in many religions and have been independently discovered by different peoples, but the main line, pursued here, is of Hindu origin. There are traditional Hindu yoga practices that resemble faggot sex, as shown in

an independent website on "Sadhu Sects". (This site is a kind of test for Faggot Yoga, like an inkblot or Rorschach test is used by pscyhologists. Which, if any, of the images, practices or concepts turn you on?)

Yogis have systematically explored remote states of consciousness through their practices (just like some faggots). Conversely, some states of consciousness experienced during fulfilling faggot sex show features that were described by ancient yogis (abandonment of norms of civilization, dissolving of boundary between self and surroundings, passive blissful acceptance of annihilating experience, absorption by and into a Power) . Some Hindu erotic representations have strong faggot resonance, e.g., Cock worship.

I want to correspond with and even meet men who are actually engaged in similar practices. Information here has been carefully selected and you should relate your experience to what is written. Please note: Sexual activity is not sufficient in and of itself; e.g., it is not enough that you suck cock religously every day. I approve of devoted cocksuckers but Faggot Yoga requires an additional commitment.

The problem is if they slip out of phase then the ripple from each
will be mixed. At 60 degrees shift the ripple between the two will be
twice that of one alternator. That can't be good for a battery. Also,
as the alternators continue to rotate against each other the output
will change from very smooth to twice as bumpy, and will do so at a
very low frequency. The problem here lies with how the regulator
senses the DC output. It's doubtful that the regulator will see true
RMS, so the result is that you will get a low frequency variation of
the DC output. Another problem is how that variation will be fed back
to the rotors from the regulator..... but that's all moot:

I did a little research and found out that only a few alternators have
regulation fast enough to smooth the ripple. That's good news because
there is no need to use a single regulator or to lock the phase of the
alternators. All that's needed is current equalization with resistors.

And for the sake of mentioning it, I also found out that most of the
newer alternators (like the Delco CS130 in my truck) use a 'switching'
type regulation scheme, which may be why alternator whine in the radio
is becoming much more common.

Land-fag laughs at steveo, too.
Land-fag says steveo has an extra small dick and cums too fast.

Feed a charged battery with more than 14 volts or so and it will go
dry very quickly.

Beats me, but from what I have found out so far I'm about ready to swap mine out for a 10SI I bought as a spare for another truck. It has a lower current rating, but I've never had one go out on me (hence the reason I still have the spare).

Really? I need two 150A alternators... and I operate quite legally, from
160 meters to 10 meters, plus 6, 2, 70cm, 1G, and 10G.

You might want to be a bit more succinct.

Besides, he might need them to power audio amps for his car stereo,
searchlights, lightbars, etc..

I didn't see any mention of what they'd be used for.. he just asked if
it'd be worth it.

If he doesn't want them, I wouldn't mind two or three... Got ideas for
some more power in the truck, and having a couple to rework would be fun.

A white italian??? Isnt that an oxymoron?? I mean we all know italians
are not white at all. They are all mulattos just like the rest of
southern greece, spain, portugal, france and others... They were all
inter-breeded with the moors. (Moorish) Africans who took over those
countries and inter-bred and lived in these countries for almost 300
years...

Same difference. Author unknown, date unknown. Anonymous authority.

The problem is that the output is far from being "DC of great purity".
The battery is used as a capacitor to smooth the ripple, just like the
filter capacitor in a power supply.

With all this discussion I'm getting ideas for a different type of
alternator: one output for the electrical system and another for an
independent battery charging system. And the battery charging system
could have outputs for both starting and deep-cycle batteries, with
remote temperature control and optional desulfator..... Ok, I'm
dreaming. But I'm definitely going to build an external regulator and
trash that micro-chip garbage that's in it now.

news:16697-41D2DC70-52@storefull-3253.bay.webtv.net... Seems a nerve was
struck. Of course, Jerry gets long winded when his behavior has been
irrefutably noted.

>What "behavior"?
"Your" behavior that has been noted on several occasion.

>First you went ballistic

Excuse you. Responding to what you knew to were forges is errant
behavior.
Misconstruing one who informs you as to your errant behavior as going
"ballistic", is additional,,,,,,,errant behavior.

>about "responding to

>forges", which I STILL don't what the hell it's

>about,

Either you are employing selective memory or your hippocampus region is
damaged, as we had this discussion in the past and you were shown the
posts that now have you professing memory impairment.

>then next thing I'm "dialing in "from

>Canada?????

No, no, no,,that wasn't the *next* thing, Jerry. The *next* thing was
you being shown the errors of your way...you know,,the forges of which
you responded. The illustration of your trolling was responsible for you
abandoning the subject on each occasion, only to plead memory

retardation when reminded. Quite simple, really. You were dialing *to*
Canada..not -from- Canada.

>I am in NC, dialing in with Bellsouth which is a

>southern/southeastern company (as far as I

>know). What the heck is going on?

Why, you're coming apart, Jerry, that's what is happening.

>Slam me

>all you like, I STILL don't what is going on.

>.??????????????????????????

I have no clue why you feel you are being slammed, persecuted, nor why
you have the need to falsely accuse others of "going ballistic" for
merely pointing out your errant behavior of responding to forges. But
it's fun to watch your self-degradation.
Referring to yourself as "Lt. Colonel" when speaking to Florida is an
ego thing, Jerry, as your rank (unlike the army, navy, marines, or af)
is not recognized by civilians. Stay with Tennessee and Georgia.

>??????????????????????????????????????

>?????????

>Ho hum. I still I don't know what you are

>talking about--

That isn't surprising at all. In fact, you plead ignorance every time
your trolling and behaviorunbecoming of a hammie is pointed out.

>or CARE for that matter.

If you had integrity, you wouldn't need others to illustrate your
actions contradict your claims.

>If I responded to "forges",

Your use of the word "if" attempts to cast doubt on your actions when
none exists. You were shown the error of your ways.

>I didn't know it was

>"illegal".

You have a one track mind concerning radio legalities and permit it to
effect your life,,,both here and outside the group. The problem with
your approach, is no one else shares your obsession with trolling for
illegalities online, regardless the trivial or important nature you
attach to your obsessions responsible for upsetting you so.

>If I am "dialling in to Canada", so what? What

>has it got to do with anything?

The same relation as the legality you invoke regarding your actions unbecoming of a hammie.

>Lt Col??? Florida???? What in the world are

>you talking about?

You are resembling a bowling pin more and more with each post you make, Jerry. I also see, you are a great ng liar. Shall we proceed with this issue where you refer to yourself as a Lt. Col in the CAP? You lie, Jerry, and for no reason other than your hatred for yourself. Denial of your CAP actions and your self-espoused rank is probably done because you are ashamed of how low you have sunk over the years with your harassment of cbers.. You have turned into one who is the exact opposite of which the hammie creed respresents. Perhaps the CAP should receive some of your more colorful posts where you troll and harass cbers because of their lingo. Yea, yea,,that's the ticket, after all, you and N8WWM initiated that bullshit in this group. The favor was returned to N8WWM, as his rep is cast in stone forever more. Perhaps you need a little more attention, Jerry.

>Tennesee

>and Georga???????????????? You are

>rambling...........

Perhaps, but that rambling is in your playgroud, Jerry. You regularly play with Fl, Tn and Ga when you play "gimme status" with your CAP games.

>Again, Ho Hum and

>zzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzzz.

Happy New Year, K4KWH!

It's only a matter of time until something similar happens in Iraq.

Baaaaaaaaaaaaaaaaaaaa.................
HA HA HA HA HA HA HA HA !!!

Hey have you been to any hamfests lately? (look around) :)
Been listening to 14.313 of late? (KJI from Indiana
is back on in the afternoon again, stirrin up things in the
truly unique way that only the 'kind jewish indian' can!)
How about 75 meters at night?

Hint: 14.313 is "re-starting again" folks!

I can name a few other freq's but U know them already.

"..faintly embarassing" they say? BOY OH BOY DID THEY
EVER GET THAT NAIL NAILED IN STRAIGHT AN
TIGHT INO THE WALL JOIST ! I don't admit to anyone
that I have a ham license, even some family.

As for stamp collecting, never been to one of those
shows, but if those stamp guys are as bung-holeo-retentive
as are the guys I've seen at train shows, I can understand 100%.

Now with all that said, I got me a Zip-Zap for X-mas.
Now leave me be whilst I torment the cat... ;)

news:16697-41D2DC70-52@storefull-3253.bay.webtv.net... Seems a nerve was
struck. Of course, Jerry gets long winded when his behavior has been
irrefutably noted.

>What "behavior"?
"Your" behavior that has been noted on several occasion.

>First you went ballistic

Excuse you. Responding to what you knew to were forges is errant
behavior.
Misconstruing one who informs you as to your errant behavior as going
"ballistic", is additional,,,,,,,errant behavior.

>about "responding to

>forges", which I STILL don't what the hell it's

>about,

Either you are employing selective memory or your hippocampus region is
damaged, as we had this discussion in the past and you were shown the
posts that now have you professing memory impairment.

>then next thing I'm "dialing in "from

>Canada?????

No, no, no,,that wasn't the *next* thing, Jerry. The *next* thing was
you being shown the errors of your way...you know,,the forges of which

you responded. The illustration of your trolling was responsible for you abandoning the subject on each occasion, only to plead memory retardation when reminded. Quite simple, really. You were dialing *to* Canada..not -from- Canada.

>I am in NC, dialing in with Bellsouth which is a

>southern/southeastern company (as far as I

>know). What the heck is going on?

Why, you're coming apart, Jerry, that's what is happening.

>Slam me

>all you like, I STILL don't what is going on.

>.??????????????????????????

I have no clue why you feel you are being slammed, persecuted, nor why you have the need to falsely accuse others of "going ballistic" for merely pointing out your errant behavior of responding to forges. But it's fun to watch your self-degradation.
Referring to yourself as "Lt. Colonel" when speaking to Florida is an ego thing, Jerry, as your rank (unlike the army, navy, marines, or af) is not recognized by civilians. Stay with Tennessee and Georgia.

>??????????????????????????????????

>?????????

>Ho hum. I still I don't know what you are

>talking about--

That isn't surprising at all. In fact, you plead ignorance every time your trolling and behaviorunbecoming of a hammie is pointed out.

>or CARE for that matter.

If you had integrity, you wouldn't need others to illustrate your actions contradict your claims.

>If I responded to "forges",

So tell me how "responding to forges" has anything to do with anything? I have seen LOTS of people respond to forges in here And if I did, so what?

Your use of the word "if" attempts to cast doubt on your actions when none exists. You were shown the error of your ways.

So what has "responding to forges" got to do with anything? Whatever the "error" of my ways is, SO?
One's "errors" are like an opinion: everyone has them.

>I didn't know it was

>"illegal".

You have a one track mind concerning radio legalities and permit it to effect your life,,,both here and outside the group. The problem with your approach, is no one else shares your obsession with trolling for illegalities online, regardless the trivial or important nature you attach to your obsessions responsible for upsetting you so.

It seems to be upsetting you more than me. If I want to post news items, I'll do it. Seems to me YOU are the one that is angry, for if it didn't bother you, you wouldn't respond. I told you 2 years ago that the stuff concering Pilot, etc was coming to pass, and you didn't believe it. Now that it IS, you're just mad and have to have someone to take it out on. Go ahead, you're not bothering me one bit

>If I am "dialling in to Canada", so what? What

>has it got to do with anything?

The same relation as the legality you invoke regarding your actions unbecoming of a hammie.

And what "actions" would that might be? PROVE where I have broken a regulation or have had an NAL. Search court records to find "dirt". (www.123nc.com), You won't find it. Not even a speeding ticket. So there!!!

>Lt Col??? Florida???? What in the world are

>you talking about?

You are resembling a bowling pin more and more with each post you make, Jerry. I also see, you are a great ng liar. Shall we proceed with this issue where you refer to yourself as a Lt. Col in the CAP?
If I did, what did it have to do with this newsgroup?

You lie,
Jerry, and for no reason other than your hatred for yourself. Denial of your CAP actions and your self-espoused rank is probably done because you are ashamed of how low you have sunk over the years with your harassment of cbers.. You have turned into one who is the exact opposite of which the hammie creed respresents. Perhaps the CAP should receive some of your more colorful posts where you troll and harass cbers because of their lingo.

EEEEEEEEWWW! That must really get to you. The lingo, I mean. Heck, the lingo speaks for itself. All you gotta do is listen to the CB.

Yea, yea,,that's the ticket, after all, you and
N8WWM initiated that bullshit in this group. The favor was returned to N8WWM, as his rep is cast in stone forever more. Perhaps you need a little more attention, Jerry.

N8WWM, don't know the man, never met him. He can post whatever he wants to. Doesn't affect me. I'll post what I want to.

>Tennesee

>and Georga???????????????? You are

>rambling..........

Perhaps, but that rambling is in your playgroud, Jerry. You regularly play with Fl, Tn and Ga when you play "gimme status" with your CAP games.

What in the world???????????????????????????? Pardon me, but I simply don't understand this. None of this makes any sense to me. Fl, Tn, Ga, "gimme status"???

Whatever floats yer boat.
